

Aipak Pharma Publishes a Complete Guide on Their Website

It is an all-in-one capsule filling machine guide with vital information that will help manufacturers and technicians optimize operations in the industry.

WUHAN, HUBEI, CHINA, July 23, 2021 /EINPresswire.com/ -- Wuhan, China – Recently, Aipak Pharma, a global pharmaceutical, food packing and cosmetic equipment supplier, has published a Complete Buying Guide on [Capsule Filling Machine](#). This guide covers an in-depth analysis of both the capsule filling working process and machines.

It is an all-in-one capsule filling machine guide with vital information that will help manufacturers and technicians optimize operations in the industry. The guide was authored by Aipak technicians and engineers, headed by Mr. Andrew Yang, Aipak Pharma general manager.

"From 2012, Aipak Pharma has committed to the development and research of pharmaceutical machines on [icapsulepack.com](#), to guarantee all machineries have high productivity and efficiency" said Mr. Andrew Yang. "This is part of the company's effort to provide in-depth knowledge and information on every pharmaceutical machine and we are glad to share a new guide on capsule filling machine."

Aipak's complete guide on capsule filling machine is a 10k-plus word guide, divided into four distinct sections:

Section 1: Capsule Filling Machines

NJP-5500C **Full automatic capsule filling machine**

NJP-5500C Full Automatic Capsule Filling Machine is especially suitable for hospitals, medical research institutions, pharmaceutical and health small factories, and they are welcomed by all customers.

This section dwells on the capsule filling machines. Again, it is further divided into eight sections that explore every aspect of capsule filling machines.

The section covers definition, types/classifications, technical specifications, quality compliance/validation, parts/components, buying tips, how to install the capsule filling machine .

Section 2: Capsule Filling Process

It covers eight critical aspects of the capsule filling process. They mainly include definition, types/techniques, advantages, disadvantages, applications, working principle ,factors affecting the capsule filling process. The section explores all these fundamental issues about the capsule filling process.

Section 3: Capsule Filling Maintenance

This section mainly introduces the common problem one may occur and how to solve them, and how to maintain the capsule filling machine and what will be the future for new technologies for this industry in the future.

Section 4: Capsule Filling Further Information

This part Aipak Pharma has added some additional information one must know before purchasing the most suitable machine, that including the 6 most important applications, 15 most critical parts you must know, what benefits you will get from the Aipak Capsule filling machine.

NJP-7500C Automatic Capsule Filling Machine adopts optimization design combined the characteristics of Chinese medicine and the requirement of GMP

NJP-1200C Full Automatic Pharmaceutical Hard Capsule Filling Machine is designed and further improved on the base of original full automatic capsule filling machine from both home and abroad.

Each section has relevant images, videos and graphics, giving more information on the automatic capsule filling process or machine. There is also a reference section at the end of the capsule filling guide.

This complete guide on capsule filling machines is tailored for both newbies and professionals in the capsule filling industry - be it the machine manufacturers or end users.

The guide is available on Aipak's website for free.
