*Collagen market globally is anticipated to reach USD 7.73 billion by 2027; growing at a CAGR of 7.2% by Revenue and 5.3% by Volume from 2020 to 2027.*

PATNA, BIHAR, INDIA, BIHAR, INDIA, July 24, 2021 /EINPresswire.com/ -- [Collagen market globally](#) is anticipated to reach USD 7.73 billion by 2027; growing at a CAGR of 7.2% from 2020 to 2027. In terms of volume, the global collagen market would foresee a CAGR of 5.3% from 2020 to 2027. Collagen is a protein found inside various connective tissues of a mammal's body in abundance. It is an essential component in food products and the healthcare industry. It has high nutritional qualities which lead to skin and health benefits in a body. Further, an outbreak of COVID-19 has led to increased health awareness among people on a larger scale. As a result, people are now keen towards buying tropical fruits, bone broth, and citrus fruits among others. Consumption of such products helps the body to produce collagen reducing skin and hair problems again leading to the growth of the market.
