

Green Building Materials Industry Outlook 2020 Through 2030

The Business Research Company's Green Building Materials Global Market Report 2021: COVID-19 Growth And Change

LONDON, GREATER LONDON, UK, July 28, 2021 /EINPresswire.com/ -- The [global green building materials market size](#) is expected to grow from \$216.99 billion in 2020 to \$238.91 billion in 2021 at a compound annual growth rate (CAGR) of 10.1%. The growth in the green building materials market is mainly due to the growing awareness

about environmental sustainability which is driving the demand for green building materials. The market is expected to reach \$383.85 billion in 2025 at a CAGR of 12.6%.

The increasing demand for green buildings is expected to drive this growth of the green building materials market in the coming years. Green building is the discipline of designing structures and employing procedures from site selection to design, construction, operation, service, remodeling, and deconstruction that are ecologically responsible and resource efficient. As green building materials are utilized to produce green buildings, the demand for green building materials is also expanding. For instance, according to a 2019 global survey conducted by World Green Building Trends Smart Market Study, nearly half of all respondents intend to construct more than 60% of their buildings as green buildings by 2021. According to the same survey, green building is also gaining popularity among building owners, with 57% expecting to make the bulk of their constructions green by 2021.
