

Business Reporter: Implementing Secure by Design and future proof IoT networks

Connectivity management platforms are key to making the most out of local networks across the globe

LONDON, UNITED KINGDOM, August 5, 2021 /EINPresswire.com/ -- In a video published on Business Reporter, Navin Arora, Executive Vice-president, TELUS Business Solutions, explains how global connectivity management platforms can help optimise IoT systems. Widely available sensors and IoT devices can't guarantee the success of IoT projects by themselves. Businesses deploying IoT solutions need to also have access to a global network which provides an optimum level of connectivity.

The best way to navigate the complexities which come with an IoT network is to rely on a centralized platform with embedded security features. The right connectivity partner also has the negotiation power that individual businesses don't, and therefore, can secure for the latter contracts offering local fees anywhere on the globe, without any time or data limitations.

TELUS, a Canadian communications technology company, entered into a partnership in February 2021 with Eseye, a British outfit with extensive experience in IoT and device design, as well as system integration and IoT certification, with TELUS bringing software and cloud capabilities to the table. To make deployments smoother for businesses, TELUS also provides its clients with IoT support services 24/7, while the company's eSIM card – a SIM card that can switch between wireless carriers without the hassle of changing physical SIMs – delivers near 100% global connectivity management across 700 mobile networks in 190 countries using an algorithm that ensures the best quality network is selected at any given moment.

•• About TELUS ••

TELUS (TSX: T, NYSE: TU) is a dynamic, world-leading communications technology company with \$16 billion (£11.6 billion) in annual revenue and 16 million customer connections spanning wireless, data, IP, voice, television, entertainment, video, and security. We leverage our global-leading technology and compassion to enable remarkable human outcomes. Our longstanding commitment to putting our customers first fuels every aspect of our business, making us a distinct leader in customer service excellence and loyalty. In 2020, TELUS was recognized as having the fastest wireless network in the world, reinforcing our commitment to provide Canadians with access to superior technology that connects us to the people, resources and information that make our lives better. TELUS Health is Canada's leader in digital health technology, improving access to health and wellness services and revolutionizing the flow of health information across the continuum of care. TELUS Agriculture provides innovative digital solutions throughout the agriculture value chain, supporting better food outcomes from improved agri-business data insights and processes. TELUS International (TSX and NYSE: TIXT) is a leading digital customer experience innovator that delivers next-generation AI and content management solutions for global brands across the technology and games, ecommerce and FinTech, communications and media, healthcare, travel and hospitality sectors. TELUS and TELUS International operate in 25+ countries around the world. Together, let's make the future friendly.

Driven by our passionate social purpose to connect all citizens for good, our deeply meaningful and enduring philosophy to give where we live has inspired TELUS, our team members and retirees to contribute more than \$820 million and 1.6 million days of service since 2000. This unprecedented generosity and unparalleled volunteerism have made TELUS the most giving company in the world.
