COVID-19 vaccinations are our best tool for stopping the spread of this deadly disease to friends, family, elders, teachers, and the people who work hard to keep our communities safe and open.

Once vaccinated, the risk of hospitalization, serious illness, or death from COVID-19 become almost zero. With the spread of more infectious strains of COVID-19, including the delta variant,

on the rise in California—community-wide protection from the disease is more important than ever.
