

# CloudChomp Announces Customer Benchmark Reporting

*CloudChomp announces Customer Benchmark Reporting to provide customers with advanced financial and technical analytics*

HOUSTON, TX, UNITED STATES, July 29, 2021 /EINPresswire.com/ --

[CloudChomp, Inc.](#), a leader in AWS cloud migration planning and discovery solutions and an Advanced Technology Partner in the Amazon Web Services (AWS) Partner Network (APN), announces a new Premium Edition feature, Benchmarking Reports. CloudChomp [CC Analyzer](#), the industry leading infrastructure rightsizing and modernization platform, offers an array of features to meet customers where they are and assist them through the entire migration journey. The agentless, all-in-one collaborative workspace, assists customers with discovery, financial modeling, license optimization, application discovery, machine and application dependency mapping, wave and migration planning, accountability, and post migration modernization.

Basic	Trial	Standard	Premium
On-Premises Asset Management & Prep	Limited Financial Reporting to Cloud	Full Financial Modeling to the Cloud	Machine & Windows Application Dependency Mapping
<b>\$ 0</b> Node Minimum: None Term: Unlimited	<b>\$ 0</b> Node Minimum: None Term: 30 Days	<b>\$ 42 / Node</b> Node Minimum: 100 Term: Annual	<b>\$ 66 / Node</b> Node Minimum: 100 Term: Annual

\* A node is considered any machine (physical or virtual) or storage asset

## Pricing Chart

CloudChomp's latest CC Analyzer Premium Edition upgrade includes Benchmarking Reports to provide customers with advanced analytics to check their financial and technical statistics with other companies or agencies of their size, region, or industry. "CloudChomp helps businesses extract maximum value from on-premises, on-cloud, and in-motion migration projects," said David Pulaski, CEO of CloudChomp. "Now, we help customers exit the bubble of their own environment to gain insight into how they perform compared to others with accurate, data-driven benchmarking reports."

Based on more than 1 trillion data points, 500,000 machines, and over 1,000 entities, CloudChomp provides customers benchmarking results in eight (8) different categories, including:

- Under utilized machines
- CPU utilization
- Memory utilization
- Hardware age
- Machine density
- Average cost per machine on-premises
- Savings % in the cloud
- Windows %

Another important time-saving advantage of benchmarking is to help businesses identify their own outlier statistics to immediately resolve problems limiting their ability to maximize return on investment (ROI) on-premises and in the cloud. CloudChomp's Benchmarking Reports, along with several other upgraded features are currently available for Premium Edition customers.

“

CloudChomp helps businesses extract maximum value from on-premises, on-cloud, and in-motion migration projects.”

*David Pulaski*

About CloudChomp, Inc.

CloudChomp, Inc. is a cloud migration tools company, helping organizations take a bite out of 21st Century Computing and IT Costs, turning bits and bytes into dollars and cents. It was founded with the explicit mission of accelerating right-sized migration to Amazon Web Services and eliminating the waste associated with manual and expensive assessment processes. The platform is built on and highly optimized for Amazon Web Services. The company is founded by two veteran software executives who have built and created exits for four other software companies.
