

thereby drives the xylene market.

The xylene market consists of the sales of xylene and related services used in printing, rubber and leather industries. Xylene is a chemical compound having isomers made from refined petroleum or liquid hydrocarbons. Xylene can also occur naturally in petroleum and coal tar. It is a colorless, insoluble, flammable liquid with a sweet odor. Xylene is used as a cleaning agent, paint thinner and remover, varnish, airplane fuel, gasoline, rust preventatives, pesticides, lacquers.

The [global xylene market size](#) is expected to grow from \$30.39 billion in 2020 to \$34.43 billion in 2021 at a compound annual growth rate (CAGR) of 13.3%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$31.46 billion in 2025 at a CAGR of -2%.
