

Rising Awareness On Immunization Consistently Drives The Vaccines Industry

*The Business Research Company's
Vaccines Global Market Report 2021:
COVID-19 Impact And Recovery To 2030*

LONDON, GREATER LONDON, UK,
August 2, 2021 /EINPresswire.com/ --
Rising awareness on immunization and
vaccination benefits in emerging
markets is consistently driving the
[global vaccines market](#) growth. World
Health Organization (WHO) is taking
initiatives to increase awareness of
immunization through global vaccine

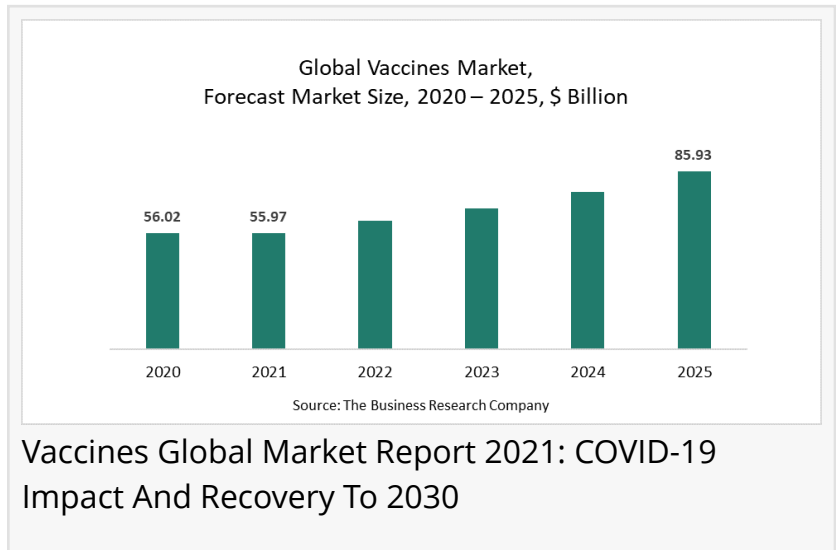

action plan (GVAP) and global immunization vision and strategy (GIVS). They aim to strengthen routine immunization, control morbidity and mortality from vaccine preventable diseases and help countries to immunize more people with a greater range of vaccines. The Organization accomplishes this work through its biological programme, the WHO Collaborating Centers, and the WHO Expert Committee on Biological Standardization (ECBS). In 2019, according to the WHO, approximately 85% of infants globally (116 million infants) received 3 doses of diphtheria-tetanus-pertussis (DTP3) vaccine, protecting them against infectious diseases that can cause serious illness and disability or be fatal. Furthermore, 125 countries reached at least 90% coverage of the DTP3 vaccine in 2019.

The [global vaccine market size](#) is expected to decline from \$56.02 billion in 2020 to \$55.97 billion in 2021 at a compound annual growth rate (CAGR) of -0.1%. The slow decline is mainly due to the outbreak of COVID-19 that has led to deferment of immunocompromised treatments. The vaccine industry worth is expected to reach \$85.93 billion in 2025 at a CAGR of 11.3%.
