

Interventional Neurology Devices And Equipment Market Grows With Increasing Neurological Disorder Prevalence

*The Business Research Company's
Interventional Neurology Devices And
Equipment Global Market Report 2021:
COVID-19 Impact and Recovery to 2030*

LONDON, GREATER LONDON, UK,
August 2, 2021 /EINPresswire.com/ --
Increase in the patient population with
the neurological disorders is driving
the interventional neurology devices
market such as the [neuroendovascular
coil market](#), neurovascular stent
market, neurovascular devices market.

Neural disorders like Alzheimer
disease, cerebrovascular diseases including stroke, migraine and other headache disorders are on the rise. The rapid increase in the geriatric population, high-stress levels in young individuals and head injuries due to accidents are the main reasons for neural disorders. For example, according to the Brain Aneurysm Foundation, it is estimated that in United States, 6 million people suffer from unruptured brain aneurysm. Also, according to World Health Organization, more than 50 million have epilepsy and over 47 million have dementia. Hence, the rapid increase in the incidence of the neurological disorders is slated to boost the market in the forecast period.

The interventional neurology devices and equipment market consists of sales of interventional neurology devices which are used to treat neurovascular diseases such as aneurysms, arteriovenous malformations, cavernous malformations, and strokes. Based on the product type, these devices are classified into aneurysm coiling & embolization devices, support devices, cerebral balloon angioplasty & stenting systems and neurothrombectomy devices. Interventional neurology devices are also known as neurovascular devices.

Read More On The Global Interventional Neurology Devices And Equipment Market Report:
<https://www.thebusinessresearchcompany.com/report/interventional-neurology-devices-and-equipment-global-market-report>

The global interventional neurology devices and equipment market is expected to grow from \$1.84 billion in 2020 to \$2.04 billion in 2021 at a compound annual growth rate (CAGR) of 10.9%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$2.72 billion in 2025 at a CAGR of 7.5%.

Major players in the market are Medtronic, Stryker, Terumo Corporation, Penumbra and Covidien.

The global interventional neurology devices and equipment market is segmented by type into aneurysm coiling & embolization devices, cerebrospinal fluid management devices, neurothrombectomy devices, support devices, by end-user into hospitals, neurology clinics, ambulatory care centers and others, aneurysm coiling & embolization devices by type into embolic coils, flow diversion devices, liquid embolic devices, angioplasty devices by type into carotid artery stents, embolic protection systems, support devices by type into micro guide wires, micro catheters, and neurothrombectomy devices by type into clot retrieval devices, suction and aspiration devices, snares.

[Interventional Neurology Devices And Equipment Global Market Report 2021: COVID-19 Impact and Recovery to 2030](#) is one of a series of new reports from The Business Research Company that provides interventional neurology devices and equipment market overview, forecast interventional neurology devices and equipment market size and growth for the whole market, interventional neurology devices and equipment market segments, and geographies, interventional neurology devices and equipment market trends, interventional neurology devices and equipment market drivers, restraints, leading competitors' revenues, profiles, and market shares.
