

# Hypolipidemics Market Growth Is Mainly Due To Changes In Diet And Lifestyle

*The Business Research Company's  
Hypolipidemics Global Market Report  
2021: COVID-19 Impact And Recovery To  
2030*

LONDON, GREATER LONDON , UK,  
August 3, 2021 /EINPresswire.com/ --  
Shifts in diet and change in lifestyles of  
people is driving the growth of

[hypolipidemic drugs market](#). Increase  
in the consumption of unhealthy food,  
rising prevalence of smoking and  
drinking have led to an increase in the  
level of cholesterol intake by the people. According to a study by Global Burden of Disease (GBD)  
in 2019, high blood pressure contributed to almost 1.47 million deaths in India. The rising levels  
of cholesterol due to change in lifestyles of the people is rising demand for hypolipidemic drugs,  
as they aid in lowering cholesterol levels.

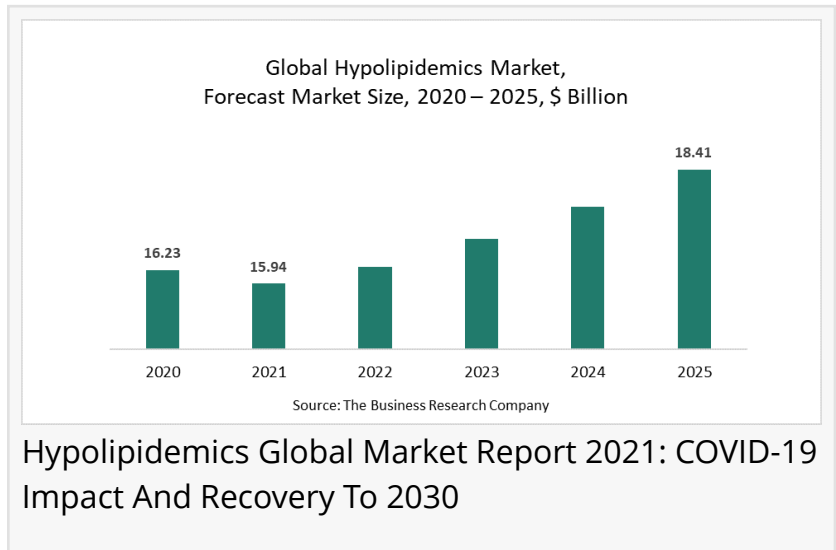

The global hypolipidemic market is expected to decline from \$16.23 billion in 2020 to \$15.94 billion in 2021 at a compound annual growth rate (CAGR) of -1.8%. The decline is mainly due to the companies' production being impacted negatively by COVID-19, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The hypolipidemic drugs market is expected to reach \$18.41 billion in 2025 at a CAGR of 3.7%.
