

Global Urinary Stone Treatment Devices Market Trends, Strategies, And Opportunities In The Market 2021-2030

*The Business Research Company's
Urinary Stone Treatment Devices And
Equipment Global Market Report 2021:
COVID-19 Impact And Recovery To 2030*

LONDON, GREATER LONDON, UK,
August 6, 2021 /EINPresswire.com/ --
According to the new market research
report '[Urinary Stone Treatment
Devices Global Market Report 2021:](#)

[COVID-19 Impact And Recovery To
2030](#)' published by The Business Research Company, the urinary stone treatment devices market is expected to decline from \$1.82 billion in 2020 to \$1.79 billion in 2021 at a compound annual growth rate (CAGR) of -1.6%. The decline is mainly due to the deferment of treatments due to the outbreak of COVID-19 that has led to a fall in demand for the equipment. The urinary stone treatment devices (or) equipment market is expected to reach \$2.46 billion in 2025 at a CAGR of 8.3%. The increasing prevalence of kidney stones, especially in the geriatric population, is driving the urinary stone treatment devices and equipment market growth.

The urinary stone treatment devices (or) equipment market consists of sales of urinary stone treatment devices and related services which are used in the treatment and management of stones formed in the kidneys and urinary tract. Stones are made of minerals in the urine that form crystals and grow into stones. About 85% of the stones are made of calcium, and the remaining portion is composed of various substances including cysteine, uric acid, or struvite.

Trends In The Global Urinary Stone Treatment Devices Market

Companies in the industry are investing in advanced laser technology and robot-assisted surgeries to treat urolithiasis. Urolithiasis is a disease condition where calculi or stones are formed in the kidney, bladder, and urinary tract of the human body. Urolithiasis open surgeries are increasingly conducted with the help of minimally invasive procedures, advanced lasers,
