

Drugs For Hormonal Replacement Therapy Market Driven By Growing Menopausal Population And Aging Population

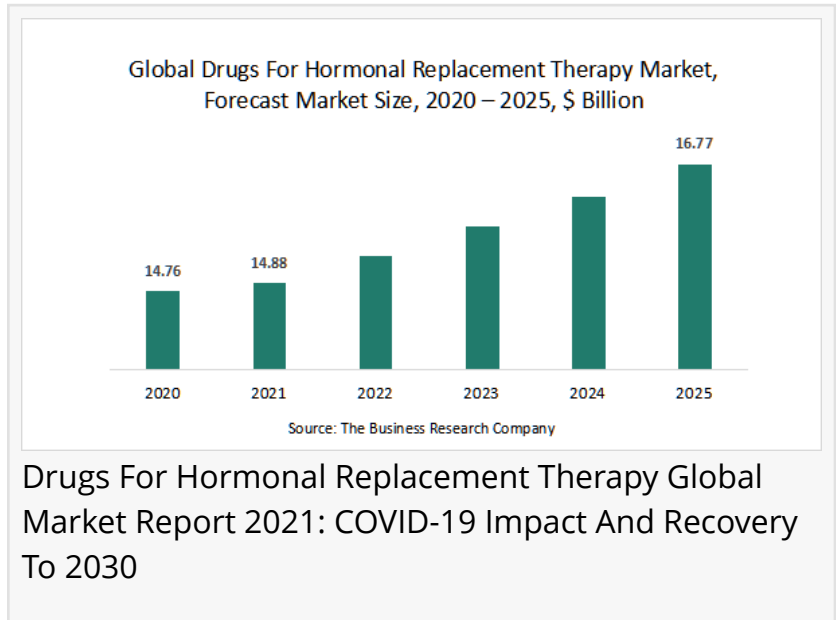

The Business Research Company's Drugs For Hormonal Replacement Therapy Global Market Report 2021: COVID-19 Impact And Recovery To 2030

LONDON, GREATER LONDON, UK, August 6, 2021 /EINPresswire.com/ -- Hormonal replacement therapy drugs such as Estrogen, Progestin, and others are used to treat medical conditions caused due to menopausal conditions. According to a report by The Indian Menopause Society, New Delhi, in India there are 65 million women over the menopausal age affected with menopausal symptoms. According to European Menopause and Andropause Society (EMAS) report, women aged over 60 are expected to reach over 1 billion by 2050. In South Korea, the female population is expected to exceed the male population by 2060, out of which 59.6% of the female population is expected to suffer from postmenopausal symptoms. Thus, the growing population suffering from menopausal symptoms and the aging population drive the market for hormonal replacement therapy drugs market.

The global drug for [hormonal replacement therapy market size](#) is expected to grow from \$14.76 billion in 2020 to \$14.88 billion in 2021 at a compound annual growth rate (CAGR) of 0.8%. The slow growth is mainly due to deferring treatments that led to a fall in the demand for drugs. The hormone replacement therapy drugs market size expected to reach \$16.77 billion in 2025 at a CAGR of 3%.
