

Global Radiopharmaceuticals Market Trends, Strategies, And Opportunities in The Radiopharmaceuticals Market 2021-2030

The Business Research Company's Radiopharmaceuticals Global Market Report 2021: COVID 19 Growth And Change To 2030

LONDON, GREATER LONDON, UK, August 10, 2021 /EINPresswire.com/
-- According to the new market research report 'Radiopharmaceuticals'
Global Market Report 2021: COVID-19 Growth and Change To 2030'
published by The Business Research Company, the
radiopharmaceuticals market is expected to grow from \$4.78 billion in
2020 to \$5.12 billion in 2021 at a compound annual growth rate (CAGR)
of 7.1%. The growth is mainly due to the companies resuming their
operations and adapting to the new normal while recovering from the
COVID-19 impact, which had earlier led to restrictive containment
measures involving social distancing, remote working, and the closure
of commercial activities that resulted in operational challenges. The
market is expected to reach \$6.75 billion in 2025 at a CAGR of 7%. The
increasing prevalence of cancer and cardiovascular diseases is
projected to drive the demand for the radiopharmaceuticals market.

The radiopharmaceuticals market consists of sales of radiopharmaceuticals and related services by entities (organizations, sole traders, and partnerships) that produce radiopharmaceuticals used in treating cancer, cardiovascular, and other diseases. Radiopharmaceuticals are radioactive compounds administered to the patients, monitored via specific imaging devices, and used for diagnostic and therapeutic purposes.

Trends In the Global Radiopharmaceuticals Market Research collaborations and partnerships are gaining significant popularity in the radiopharmaceuticals market over recent years. Major companies operating in the

radiopharmaceuticals market are collaborating with other industry players to conduct R&D activities to expand their business. For instance, in March 2020, Debi pharms, a Switzerland-based biopharmaceutical company, signed a research agreement with 3B Pharmaceuticals (3BP), a Germany-based biotechnology firm, to develop the Debi 0228 radioligand program, targeting CAIX (Carbonic Anhydrase 9) enzyme to fight the progression of cancer.
