

Translucent Concrete Market Registering a CAGR of 39.9% from 2020 to 2027

Translucent Concrete Market Excessive Growth Opportunities Estimated to be Experienced 2021-2027

PORTLAND, OR, UNITED STATES, August 11, 2021 /EINPresswire.com/ -- Global [translucent concrete market](#) size accounted for \$2,469.7 thousand in 2019 and is expected to reach \$21,022.8 thousand by 2027, registering a CAGR of 39.9% from 2020 to 2027. In 2019, Europe dominated the global translucent concrete market, in terms of revenue, accounting about 74.5% share of the global translucent concrete industry, followed by Asia-Pacific and LAMEA.

Translucent concrete is an energy efficient material that can be used to reduce the usage of the energy consumption that is used for lighting systems in the internal spaces of the buildings during daytime. Usage of translucent concrete to build walls of the buildings reduces the consumption of energy. Further, it also helps cut the overall operating cost of building. Moreover, translucent concrete can be used to enhance the aesthetic look of the infrastructure. For instance, translucent concrete can be used as façades for the infrastructure to attract attention of the public. This includes restaurants, museums, malls, and indoor theatres.
