

Disposable Gloves Market in India Size to Reach \$760 million and at a 12.4% CAGR by 2025

Increased awareness and concern regarding safety and hygiene plays a major role in the growth of the India disposable gloves market.

PORTLAND, OR, UNITED STATES, August 11, 2021 /EINPresswire.com/ -- Disposable gloves are widely used in the healthcare and food industries for protection from infections. It acts as a barrier between users and contaminations as well as infectious diseases. The disposable gloves are used in various sectors such as medical, dental, food, chemical, oil & gas, and other industries for preventing cross-contamination. These gloves exhibit outstanding strength, dexterity, and comfort. In addition, these gloves provide chemical resistance and good grip to the users.

Disposable Gloves

The India disposable gloves market was valued at \$303 million in 2017, and is expected to reach \$760 million by 2025, growing at a CAGR of 12.4% during the forecast period. In terms of volume, the natural rubber gloves segment accounted for more than two-fifth of the total market share in 2017.

Covid-19 scenario:

1) The economic crisis would not affect the industry much as the disposable gloves operations have not been stopped due to corona virus pandemic.

2) The supply, demand, and manufacturing of disposable gloves has not affected by lockdown as it comes under the category of essential goods.

India expendable gloves market is required to display critical development during the conjecture time frame because of ascend in mindfulness and worry of wellbeing and cleanliness among the populace just as development in the quantity of end clients. What's more, improvement of novel methodologies and innovative progressions further enhancement the development of the India expendable gloves market. Nonetheless, less number of assembling plants and less creation limit in the nation are relied upon to control the market development. Unexpectedly, the development in the medical care area and expansion in medical services consumption are expected to give new freedoms to the market major parts soon.

Based on product, the market is classified into natural rubber gloves, nitrile gloves, vinyl gloves, neoprene, polyethylene, and others. The neoprene segment would exhibit the highest CAGR during the forecast period as these gloves have wide usages in medical and non-medical industries. Neoprene gloves are ideally used in the field of agriculture, chemical, cleaning, oil & petrol refining, and cleaning & maintenance. These gloves are resistant to chemicals and more durable than the natural rubber gloves.

Based on the form of disposable gloves, the market is bifurcated into powdered disposable gloves and non-powdered disposable gloves. The powdered disposable gloves segment holds the highest revenue in 2017 and is anticipated to continue its dominance during the forecast period as these gloves contain powder as a lubricant that makes them non-sticky and they are easily available at an affordable cost in the Indian market.
