The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$0.51 billion in 2025 at a CAGR of 5%. Rising prevalence of diabetes is driving the market for lancing devices and equipment as more people depend on lancing devices to test blood glucose levels.
