

STP and STC announce the release of its newly developed EHS audit protocol for Chile

Latest EHS Regulations Updates Assist Companies to Achieve EHS Compliance

VANCOUVER, BRITISH COLUMBIA, CANADA, August 18, 2021 /EINPresswire.com/ -- STP ComplianceEHS (STP) and Specialty Technical Consultants (STC) announce the release of its recently updated EHS protocol for Chile. This audit protocol, which covers relevant national EHS requirements, was previously updated in April 2019. The regulatory date for the current release is April 2021.

Leading companies around the world use EHS audit protocols to understand the scope of their EHS regulatory obligations and rapidly collect, share, archive, and export audit findings in a cost-effective manner. EHS audit protocols are prepared by STC in partnership with STP and continue to focus on those national (plus, in some cases, regional or provincial) EHS requirements that have site-specific applications for manufacturing operations. As a leading EHS management consulting firm with a global network of experienced EHS teaming partners, STC has in-depth knowledge and technical expertise of local/regional EHS requirements.

STP and STC maintain leading-edge EHS audit protocols for more than 50 jurisdictions. The protocol documents are written in English and are available in MS Word, Adobe Acrobat and Excel formats, as well as through STP's web-based portal or can be integrated into an existing company platform. Using the protocols' custom templates and advanced functionality features, auditors can easily track audit findings and manage data over time to improve compliance, risk management and safety performance. In addition, STP's formatting is compatible with leading risk management and sustainability platform providers.

Highlights of selected legislation covered in the newly developed protocol include:

Decree No. 3 of 26 March 2019 issued by the Ministry of the General Secretariat of the Presidency establishes rules for import and export of substances controlled by the Montreal Protocol and its amendments, including maximum import volumes and criteria for their distribution. This Decree repealed and replaced Decree No. 75 of 2012.

Exempt Decree No. 1,574 of 12 November 2019 issued by the Ministry of the Environment approves the general instructions for online connection of Continuous Environmental Monitoring Systems (CEMS).

Decree No. 18 of 23 April 2020 issued by the Ministry of Labor establishes safety regulations for employees who telework or work remotely.

Decree No. 57 of 26 November 2019 issued by the Ministry of Health approves rules for the classification, labeling, and notification of hazardous chemical products in accordance with the Globally Harmonized System of Classification and Labeling of Chemical Products (GHS).
