COVID-19 vaccinations are LA county's best tool for stopping the spread of this disease to family, friends, coworkers, and essential workers who continue to work hard to keep our community safe and open. If vaccinated against Covid-19, the risk of hospitalization, serious illness, or death become increasingly less and helps keep our hospitals from reaching capacity. With the rising spread of more infectious strains of COVID-19, like the delta variant, community-wide protection from the disease is important now more than ever.
