

# Damiva Applauds Maine's Groundbreaking Ban on Toxic Forever Chemicals

*Damiva has several patents on chemical-free and 100% natural skin care and fem care products. Maine is the first state to ban 9,000 toxic "forever chemicals."*

TORONTO, ONTARIO, CANADA, August 18, 2021 /EINPresswire.com/ -- Chia Chia Sun, [CEO of Damiva](#), supports the groundbreaking legislation by the state of Maine that will eliminate toxic "forever chemicals" by 2030. "It reaffirms our approach," Sun says, "which is to develop 100% natural skin and feminine care products that are water-free, chemical-free and available to all women."

It was the discovery of "forever chemicals" in the milk of dairy cows in Maine that prompted state legislators to ban 9,000 toxic chemical

compounds including per- and polyfluoroalkyl substances (PFAS) that are very persistent in the body and environment. Cows were eating hay and drinking water that contained high levels of PFAS that had leached from waste water treatment plants. PFAS and their by-products are

known to cause metabolism problem, cancer and low birth weight.

“

It reaffirms our approach, which is to develop 100% natural skin and feminine care products that are water-free, chemical-free and available to all women.”

*Chia Chia Sun*

By 2023, companies in Maine will be required to report the presence of PFAS and other chemicals in their products and by 2030, a full ban will be in effect.

“Forever chemicals” are present in food, cosmetics, household products and even drinking water. A key aspect of PFAS products is that they can accumulate in the tissue
