

Steel Grating Market Top Companies Statistics Analysis, Trends, Challenges, and Opportunities, Forecast To 2027

High demand from end-use industries due to its benefits such as excellent tensile strength that increases durability & reliability & technological advancements.

OREGON, PORTLAND, UNITED STATES, August 17, 2021 /EINPresswire.com/ -- According to the report, the global [steel grating industry](#) generated \$182.2 billion in 2019, and is expected to garner \$261.2 billion by 2027, witnessing a CAGR of 4.7% from 2020 to 2027.

Prime determinants of growth:

High demand from end-use industries due to its benefits such as excellent tensile strength that increases durability & reliability and technological advancements drive the growth of the global steel grating market. However, carbon emissions generated during the production and ease in availability and advantages of FRP grating hinder the market growth. On the other hand, various customizations offered by market players for grating products present new opportunities in the coming years.

COVID-19 Scenario:

- Manufacturing activity has taken a toll due to the lockdown imposed by governments in many countries. The shortage of raw materials has been occurred due to disrupted supply chain. In addition, non-availability or less availability of workers is another hindrance due to which manufacturing activities came to halt.

- The demand from the end-use industries such as oil & gas, construction, electric power, and mining reduced considerably due to discontinuation in operations during the lockdown. However, demand is expected to grow during the post-lockdown period.

The carbon steel grating segment to maintain its lead position during the forecast period:

Based on material type, the carbon steel grating segment accounted for the largest market share in terms of revenue, contributing to nearly three-fourths of the global steel grating market in 2019, and will maintain its lead position during the forecast period. This is due to the growth of the construction industry in the developing economies and its utilization in trench and drainage covers to drain water and block wastes. However, the stainless steel grating segment is estimated to witness the fastest CAGR of 6.7% from 2020 to 2027. This is attributed to increase in demand from chemical manufacturers across the countries of Europe and the Asia-Pacific region for the resistance provided by this material type to chemical and corrosive environments.

The oil & gas segment to continue its leadership status by 2027:

Based on end-use industry, the oil & gas segment contributed to the highest share in 2019, accounting for more than one-tenth of the global steel grating market, and is expected to continue its leadership status by 2027. This is attributed to rise in offshore oil & gas exploration activities from major oil-producing companies of the U.S., China, and Latin America. However, the pharmaceuticals segment is estimated to grow at the fastest CAGR of 5.5% during the forecast period, owing to increase in investments in building new manufacturing facilities and utilize steel grating to build platform, floor, corridor channel, and stair treads in the plants.

Asia-Pacific to offer lucrative opportunities, North America to grow steadily:

Based on region, Asia-Pacific held the largest share in 2019, contributing to more than one-third of the global steel grating market, and will continue its dominance in terms of revenue during the forecast period. Moreover, this region is projected to manifest the largest CAGR of 6.0% from 2020 to 2027. This is attributed to presence of oil refineries, pharmaceutical, and chemical manufacturing facilities in the region. However, North America is estimated to grow at a CAGR of 3.7% during the forecast period.

Leading Market Players:

- Nucor Corporation
- Almont Industries
- Sinosteel Corporation
- Alabama Metal Industries, Corporation (AMICO)

- Anping Enzar Metal Products Co. Ltd.
- Ohio Gratings
- B&R Metals
- Unionweld Kennedy
- Interstate Gratings
- Ditchgitter GmbH

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domains. AMR offers its services across 11 industry verticals including Life Sciences, Consumer Goods, Materials & Chemicals, Construction & Manufacturing, Food & Beverages, Energy & Power, Semiconductor & Electronics, Automotive & Transportation, ICT & Media, Aerospace & Defense, and BFSI.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
