

SOF® Tourniquet, OLAES® Hemostatic Bandage, and RISE™ Selected as JEMS Hot Products at EMS Today 2021

The SOF® Tourniquet, OLAES® Hemostatic Bandage, and RISE™ are among several innovative new products for emergency medical services and prehospital care.

ANDERSON, SC, USA, August 17, 2021 /EINPresswire.com/ -- [TacMed Solutions™](#) and JEMS (Journal of Emergency Medical Services) are proud to announce the selection of the [SOF® Tourniquet](#), [OLAES® Hemostatic Bandage](#), and RISE™ (Rigid Immobilization System for Extremities) as hot products at the EMS Today Conference & Exposition 2021.

SOF® Tourniquet, OLAES® Hemostatic Bandage, and RISE™

The SOF® Tourniquet, OLAES® Hemostatic Bandage, and RISE™ were selected by a panel of judges made up of emergency medical services (EMS) product specialists, physicians, educators, administrators and paramedics. Judges reviewed products that deliver optimal emergency medical care to sick and injured patients and provide EMS agencies a more innovative, safe and efficient approach.

“We constantly strive for innovation and functionality with products that solve problems for the warfighter, professional first responder and civilians alike,” said Will Wennberg, CEO of TacMed Solutions. “We are always looking to incorporate feedback from our users to improve upon our existing products as well. With our recent product launches of the SOF-T, OLAES Hemostatic and the RISE Splint, we were able to achieve just that. We are delighted JEMS recognized this and are honored to have been chosen for this prestigious award.”

Products were evaluated based on the following categories:

- Originality
- Functionality

- Base of use
- Need in the EMS setting

The SOF® Tourniquet, OLAES® Hemostatic Bandage, and RISE™ were selected as a Hot Product after the EMS Today Hot Products review team reviewed and rated dozens of products.

JEMS Editor Emeritus A.J. Heightman said: "To earn the title of a JEMS Hot Product, a product has to be innovative and practical. Submissions this year were truly revolutionary and highly functional. That shows our industry is keeping pace with the current science of emergency medicine and companies are developing or upgrading products to stay ahead of the curve."

About TacMed Solutions™

TacMed Solutions™ (TacMed™) is dedicated to improving survivability in response to crisis situations through world-class innovative emergency response solutions designed to equip, train, and protect those who save lives. We develop and manufacture customized emergency response technology, advanced simulation and training aids, and personal protective gear for Warfighters, First Responders, and citizens alike to effectively manage the full continuum of care.

About JEMS

JEMS is the authoritative source of information on prehospital emergency care for EMS providers worldwide. JEMS presents provocative and challenging articles and columns on clinical breakthroughs, industry news and trends, new products and continuing education.
