

Bihoku Funka joins BuyChemJapan

Bihoku enters into partnership with BuyChemJapan Corporation's online marketplace to promote their calcium carbonate for pharmaceuticals and food additives.

OSAKA CITY, OSAKA PREFECTURE,
JAPAN, August 18, 2021

/EINPresswire.com/ -- BuyChemJapan Corporation (President: Masa Oguchi) is pleased to announce that Yoneyama Kagaku Kogyu (President and General Manager of General Affairs

Department: Seiichi Kato) has joined the growing number of Japanese chemical manufacturers who have decided to join the roster of companies who will sell their products via the upcoming online chemical marketplace BuyChemJapan.

Bihoku Funka has entered into a product promotion partnership with BuyChemJapan Corporation

Bihoku Funka was founded in 1942 and has been dedicated to the production of safe and versatile calcium carbonate for a long time. We pursue high purity and ultra-fine powder in our products, which are used not only in industrial applications but also in various fields such as foods and pharmaceuticals. As a Japanese brand, we are proud of our high competitiveness on the international stage.

Under this new agreement, chemical buyers around the world can connect with Bihoku Funka and its products through the BuyChemJapan Corporation-operated BuyChemJapan marketplace.

BuyChemJapan Corporation is a start-up spun off from Daishin Corporation, a trading company specializing in chemicals. With a deep understanding of the needs and business practices of both domestic and foreign manufacturers and buyers within the chemical industry, BuyChemJapan Corporation can actively promote Japanese competitive chemicals to overseas buyers through its upcoming free online marketplace, which will specialize in introducing chemical products and promoting brand recognition. In a marketplace shaped by the COVID-19 pandemic, companies can no longer carry out traditional sales activities, so the time to shift to digital, online activities has come.

BuyChemJapan marketplace has been designed from the ground up to help simplify the process of introducing the demands of buyers to leading Japanese chemical manufacturers. Buyers can...

Search for the required chemical via a comprehensive set of options and definitions.

Make direct contact with the manufacturer with one click, removing the need to deal with intermediaries.

Request a sample, price quotation or make an order directly from the manufacturer.

Make a fully informed purchasing decision through use of a function which allows for direct comparison of chemical qualities and manufacturers costs (available post launch).

Buy with complete confidence as the marketplace is only partnered with manufacturers who produce chemicals at their own factories.

Any business currently being undertaken can be re-routed through BuyChemJapan, benefiting from the additional transparency and convenience the service provides.

BuyChemJapan Corporation is actively searching for and partnering with a rising number of chemical manufacturers and will launch its marketplace in September 2021 to optimize transactions for both manufacturers and buyers. Watch this space!

If you are an international chemical buyer who wants to negotiate directly with Japanese chemical manufacturers rather than go through troublesome, and expensive, intermediaries, then this is the service for you! Those wishing to be notified of the launch of BuyChemJapan Corporation's new marketplace [can click here](#) and sign up for notification of when the marketplace launches.
