

# Precast Construction Market in Chile Expected to Reach \$492.1 million by 2027

*Chile Precast Construction Market  
Upcoming Trends, Growth Analysis, Latest  
Technology by 2027*

PORTLAND, OR, UNITES STATES, August 19, 2021 /EINPresswire.com/ -- Precast construction includes casting of building members such as columns & beams, facades, girders, and others in controlled environments. These parts are further transported to the actual site and joined together either using bolted connections or grouting with

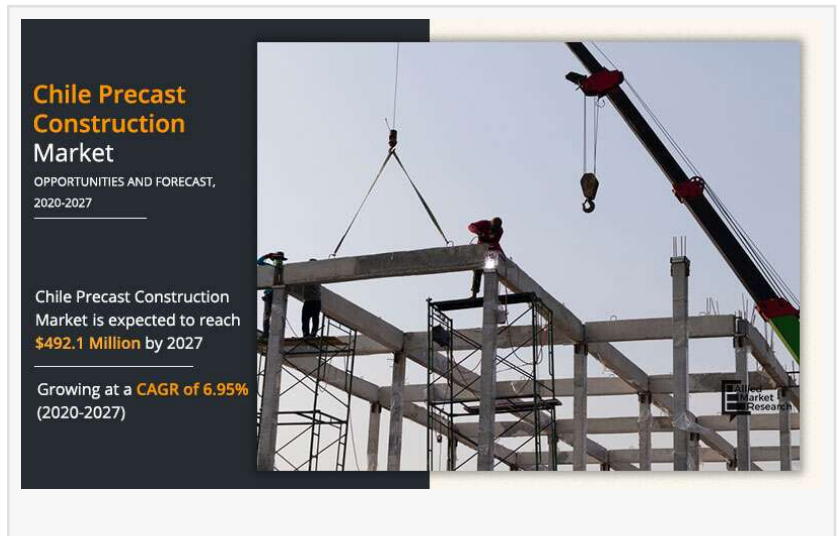

concrete. Precast construction is often termed as prefabricated construction or off-site construction. It is bifurcated into two types namely, manufactured homes and modular construction. Modular construction includes assembly of various components of a building and transporting them separately to the project site for assembly.

The [Chile precast construction market](#) size is expected to reach \$492.1 million in 2027 from \$323.0 million in 2019, growing at a CAGR of 6.9% from 2020 to 2027. In 2019, non-residential construction dominated the market, in terms of revenue, accounting for 69.6% share of the Chile precast construction market.

## Chile Precast Construction Market Segments

### By Product Type

- Columns & Beams
- Floors & roofs
- Walls
- Staircases
- Girders
- Paving slabs
- Others

### By Construction Type

- Modular construction
- Manufactured homes

### Key Findings Of The Study

- By product type, the columns & beams segment dominated the Chile precast construction market share in 2019.
- By end-user industry, the non-residential segment dominated the Chile precast construction market during 2019.
- Depending on construction industry, the modular construction segment garnered major share of the Chile precast construction market in 2019.
