The drivers, restraints, and opportunities are broadly analyzed in the liquid packaging carton market report. Increase in population, change in lifestyle, surge in need for packaged food & beverages, stringent regulatory policies on plastic packaging materials, and rise in number of hypermarkets & food chains drive the market growth. Nonetheless, availability of substitute for liquid packaging cartons and increase in demand for glass packaging restrict the market growth. On the other hand, strengthening product innovation in the liquid packaging offer new

opportunities for the growth of the market.

The liquid packaging carton market report evaluates each of the segments and its sub-categories in detail. The market is segmented into carton type, shelf life, end user, and geography. Based on carton type, it is divided into brick liquid carton, shaped liquid carton, and gable top carton. The brick liquid carton segment would dominate the market through 2025. Based on shelf life, the market is bifurcated into long shelf life carton and short shelf life carton. The long shelf life cartons segment would remain in the lead position in terms of revenue as well as grow at the fastest CAGR of 4.8% from 2018 to 2025. Based on end user, the market is bifurcated into liquid dairy products, non-carbonated soft drinks, liquid food, and alcoholic beverages. The liquid dairy products segment garnered 68.9% of the market share in 2017 and is expected to remain dominant through 2025. Geographically, the market analysis covers North America, Europe, Asia-Pacific, and LAMEA. Europe would grab the largest market share during the forecast period while Asia-Pacific would attain the fastest CAGR of 5.3% during the forecast period.
