

Bottled Water Market Report 2021-26: Size, Share, Trends, Growth, Market analysis

According to the latest report by IMARC Group, the global bottled water market grew at a CAGR of around 7% during 2015 & 2020.

SHERIDAN, WYOMING, UNITED STATE, August 20, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group, The global [bottled water market](#) grew at a CAGR of around 7% during 2015-2020. Looking forward, IMARC Group expects the market to exhibit moderate growth during 2021-26.

Bottled water serves a steady taste, improved purity, and better quality in comparison to tap water. The bottles are usually treated with ultraviolet (UV) irradiation before packaging to prevent the growth of pathogens during storage and transportation. After the disinfection process, the bottles are filled with water, labeled, and sold in different sizes.

Market Trends

The increasing consumer health consciousness, along with the high prevalence of water-borne diseases due to unsafe drinking water, is primarily augmenting the demand for bottled water. Furthermore, the rapid product premiumization on account of rising disposable income levels is also bolstering the market growth. The expanding HoReCa sector is further driving the adoption of premium bottled water on a global level. Additionally, the increasing participation of the masses in outdoor games and activities is promoting the utilization of compact water bottles. Besides this, the installation of smart vending machines for bottled water across numerous countries is positively influencing the market growth. Moreover, the introduction of lightweight and eco-friendly packaging solutions for bottled water will continue to drive the global market in the coming years.
