

Fintel Short Squeeze Explorer Identifies Short Squeeze Opportunities for Retail Investors

Fintel's short interest data identifies candidates for the week of August 22

NEW YORK, NEW YORK, UNITED STATES, August 23, 2021

/EINPresswire.com/ -- [Fintel.io](https://fintel.io), a provider of advanced research tools for data-driven investors, has developed a mathematical model that provides investors and traders with data that helps quantify the short squeeze risk for a company. This model takes into account a number of factors that contribute to short squeezes, including relative short interest, borrow fee rates, trading volume, and others.

The [Short Squeeze Explorer](#) provides a leaderboard ranking of companies with the highest Short Squeeze Score so traders can easily identify companies

with the highest likelihood. For traders who want to find short squeeze opportunities before they happen, the Short Squeeze Explorer is an ideal tool.

Below are notable Short Squeeze candidates as of August 22, 2021 at 6:00pm EST:

* VRPX / Virpax Pharmaceuticals, Inc. (99.15)

VRPX has a borrow fee rate of 85% and has had a significant runup in pricing and volume during the last month. This price runup could put pressure on short-sellers and precipitate a short squeeze.

* CRDL / Cardiol Therapeutics, Inc. Class A (96.06)

CRDL has a borrow fee rate of 39.1% and, like VRPX, has had a significant runup in price and volume, both of which could foretell a short squeeze.

* NAOV / NanoVibronix, Inc. (95.77)

NAOV has a borrow fee rate of 122% and a short interest % float of 30.19%, both of which are significant factors that could contribute to a short squeeze.

* SPRT / Support.com, Inc. (95.15)

SPRT has a short interest % of float of 40% and a borrow fee rate of 85.7%, which places the stock at number four on this week's list.

* BTBT / Bit Digital, Inc. (94.99)

BTBT has a borrow fee rate of 21% and a short interest % of float of 16%, placing the company at number five on this week's list.

Short Squeeze Scores scoring model ranges from 0 to 100, with 100 being most likely, relative to its peers.

The Short Squeeze Explorer also compiles data like Short Interest % Float, Change in Volume, Change in Price, and Borrow Fee Rate into an easy-to-use leaderboard for investors to reference when making decisions.
