market reached a value of US\$ 54.58 Billion in 2020. Looking forward, IMARC Group expects the market to reach a value of US\$ 80.86 Billion by 2026. Mushroom is a type of nutritious fungus that is considered to be edible and forms an essential part of various cuisines across the globe. Edible mushrooms are generally grown in a controlled environment with appropriate light, humidity, ventilation, nutrients, soil pH levels, and air pressure. They are highly rich in potassium, riboflavin, selenium, and Vitamin D and are proven to be extremely beneficial in building immunity, managing weight, and minimizing the risks of various chronic ailments. Besides this, several kinds of non-edible mushrooms are also utilized in the pharmaceutical and nutraceutical industries.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
