

# Functional Apparel Market Expected to Reach \$505.80 Billion by 2026

*Functional Apparel Market : Global Opportunity Analysis and Industry Forecast, 2019–2026*

POTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATE, August 25, 2021 /EINPresswire.com/ -- According to a new report published by Allied Market Research titled, "Functional Apparel Market by Nature and Application: Global Opportunity Analysis and Industry Forecast, 2019–2026," the functional Apparel market size was valued at \$282.30 billion in 2018 and is expected to reach \$505.80 billion by 2026, registering a CAGR of 7.7% from 2019 to 2026. In 2018, Europe accounted for nearly 30.2% share of the functional apparel market.

Functional apparels are among the main types of technical textiles clothing that are receptive to new product development and technologies. The emergence of functional clothing has been fueled by recent breakthrough and advances of technical fibers and fabrics materials that are being used.

Millennials tend to take a more holistic approach to health and wellness factor. They are active and always keen to indulge in fitness oriented activities. Fitness has become an integral part of one's daily routine. Considering millennials' perception on fitness, functional apparel manufacturers have successfully built an emotional connect between their products and customer. These customers specifically seek for apparels that promote an active lifestyle. Hence rise in number of millennials turns out to be an influential trend.

The extensive advantages offered by active wear such as water resistance, bi-stretchable function, anti-bacterial fabric, wicking function, and others, and surge in participation of customers in physical and fitness activities act as the key driving factors of the global market. Moreover, female consumer base for active wear is increasing, owing to holistic approach of female customers toward sports and fitness. Likewise, increase in adoption of athleisure wear as work or street wear propels the growth of the overall market. Furthermore, rise in disposable income and increase in fitness concerns significantly contribute toward the functional apparel market growth.

However, volatile cost of raw materials and inflated cost of designing lead to high cost of the

final product. This hampers the sales of the product among product type-sensitive customers, thereby restraining the market growth. Moreover, presence of counterfeit brands results in safety issues and inconvenience for consumers, which hamper the growth of the market. Hence volatile raw material cost hampers the market during the functional apparel market forecast.
