*Back To School Myopia Control - Vision Boutique Offers Certified Care*

CHICAGO, IL, UNITED STATES, August 26, 2021 /EINPresswire.com/ -- With back to school just around the corner, the eye health of our kids is a top priority. Taking care with a child's vision is a gift that can truly last a lifetime. [Myopia Control](#) is a term that is used to describe a treatment that slows the progression of nearsightedness in children.

Symptoms of nearsightedness in children include:

- Persistent squinting
- Needing to sit closer to the television or in the front of the class
- Excessive blinking
- Frequent rubbing of the eyes

Treatment Options:

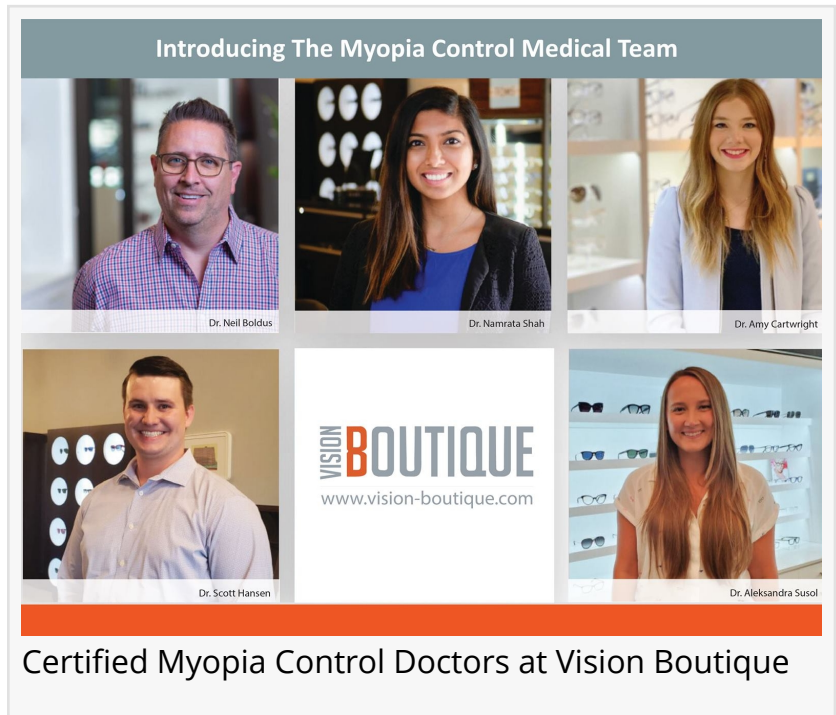

[Vision Boutique](#) specializes in two types of Myopia Control treatments, Atropine eye drops and specialty contact lenses. Both treatment options can be prescribed by an eye doctor to ensure healthy eyes, and to reduce the risk of vision-threatening complications later in life such as glaucoma, cataracts, and retinal detachment.

Our Certified Team:

Dr. Neil Boldus, Dr. Namrata Shah, and Dr. Amy Cartwright are proudly certified in Myopia Control, with certifications from Dr. Scott Hansen and Dr. Alexandra Susol in process.

About Vision Boutique:

Vision Boutique is established in the midwest, offering full-service vision solutions at 6 locations in Illinois and Indiana.
