

Aloe Vera Market Size, Share, Development, Trends, Demand and Forecast Till 2026

SHERIDAN, WYOMING, UNITED STATES, August 27, 2021 /EINPresswire.com/ --

According to IMARC Group's latest report, titled "[Aloe Vera Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)," the global Aloe Vera market is expected to grow at a CAGR of around 7% during 2021-2026. Also known as Aloe barbadensis miller, aloe vera is a succulent plant that belongs to the Asphodelaceae (Liliaceae) family. It has an outer layer of 15-20 cells, which

helps protect the plant and synthesize proteins as well as carbohydrates. Its leaves comprise a clear gel with 99% water while the remaining is made up of lipids, sterols, vitamins, amino acids and glucomannans. Aloe vera contains active constituents, such as vitamins, enzymes, minerals, and fatty acids. It has anti-inflammatory and therapeutic properties, as well as accelerates wound contraction and increases the breaking strength of the resulting scar tissue. As a result, it is commonly used in the [food](#), personal care and pharmaceutical industries across the globe.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviors of the consumers globally—our estimates about the latest market trends and forecast values after considering the impact of this pandemic. These observations will be integrated into the report.

Aloe Vera Market Trends and Drivers:

Aloe vera is utilized in the production of personal care products, such as face wash, toners, face packs, anti-aging creams and body lotions, as it offers anti-aging and moisturizing benefits. It is also used in shampoos, conditioners, and hair packs and serums as it assists in conditioning the hair, promoting hair growth, removing dandruff and maintaining the pH level of the scalp. Apart

from this, aloe vera provides health benefits, such as reducing inflammation and cholesterol levels, easing acid reflux and reducing periodontal diseases, regulating blood sugar level, improving digestion, and treating hemorrhoids and acne. Consequently, it is employed in the manufacturing of numerous nutraceutical products worldwide. However, due to the sudden outbreak of the coronavirus disease (COVID-19), lockdowns have been imposed by governments of numerous countries. This has resulted in the temporary shutdown of various manufacturing units, which is negatively influencing the market.

Market Summary:

Based on the product, the market has been segmented into aloe vera gel, whole leaf and other extracts.

On the basis of the form, the market has been segregated into concentrates, gels, drinks, [powders](#) and capsules.

The market has been analyzed on the basis of the application into the pharmaceutical, cosmetics and food industries.

Region-wise, the market has been classified into the United States, Thailand, Mexico, Dominican Republic, Costa Rica and others.

The competitive landscape of the market has been examined in the report, along with the detailed profiles of the major players operating in the industry.
