General Minerals Global Market Report
2021: COVID-19 Impact And Recovery To
2030*

LONDON, GREATER LONDON, UK, August 27, 2021 /EINPresswire.com/ -- According to TBRC's general mineral mining report 2021, the global [general minerals market](#) size is expected to grow from \$1.43 trillion in 2020 to \$1.57 trillion in 2021 at a compound annual growth rate (CAGR) of 9.7%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$3.32 trillion in 2025 at a CAGR of 21%.

Major players in the general mineral industry include CRH Plc, Israel Corporation Ltd, The Mosaic Company, OCP SA, PotashCorp.

Mining companies are using advanced geosynthetic clay liners to prevent leakage and corrosion in mining operations. GCLs are geotextile and bentonite composites used in environmental containment applications. Advanced GCLs have higher chemical compatibility, slope stability, composite construction, swelling capacity and lower permeability than conventional clay liners. Other benefits of GCL include easy installation, better hydraulic performance, and resistance to varying weather conditions. Major companies offering GCLs include CETCO, GSE, Elcoseal,
