

# Benign Prostatic Hypertrophy Market Trends Include Treatment With Combination Drugs

*The Business Research Company's Drugs For Benign Prostatic Hypertrophy Global Market Report 2021 : COVID-19 Impact And Recovery*

LONDON, GREATER LONDON , UK, August 30, 2021 /EINPresswire.com/ -- Combination drugs are increasingly being used in the treatment of [benign prostatic hypertrophy](#) as they are more

effective and help prevent disease progression. A combination drug includes two or more active pharmaceutical ingredients (APIs)

combined in a single dosage form. These drugs reduce the development of drug resistance, have fewer side effects and low treatment failure rate. For instance, Duodart, a combination of dutasteride and tamsulosin hydrochloride is increasingly being prescribed for the treatment of benign prostatic hypertrophy.

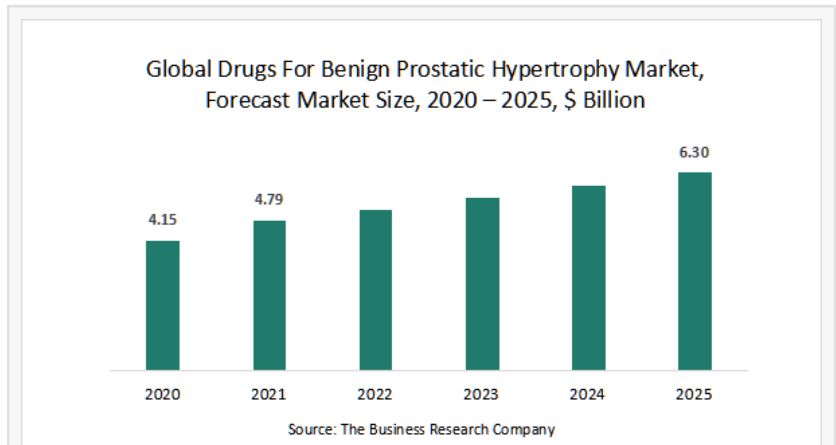

Major players in the BPH drug industry are Allergan PLC, Astellas Pharma Inc., Boehringer Ingelheim, Eli Lilly and Company, GlaxoSmithKline PLC.

Benign prostatic hypertrophy drugs manufacturers globally are regulated by various regulatory bodies. For instance, in the European Union, the EU legislation authorizes medicines based on quality, safety, and efficacy. Companies are mandated to submit compliance documentation for suitable quality before applying for authorization. Manufacturers are required to demonstrate safety and efficacy of drugs using clinical trials data which will be assessed by competent authorities before authorizing for sale.
