Key Players:

The global F&B Disinfection industry is highly fragmented with major players like Evonik, Neogen Corporation, Solvay, Stepan Company, FINK TEC GmbH, Entaco, CCL Pentasol, and Xylem among others.

Further key findings from the report suggest:

- In seafood Industry, ozonation is one of the popular technology used. Trihalomethanes or dioxins are harmful by-products produced when chlorine reacts with organic matter found in water. Use of ozone technology eliminates the possible formation of toxic residues.

Reports And Data

- Chlorine Dioxide is a compound used as a sanitizer to be effective against bacteria, fungi and viruses. Chlorine dioxide can also acts as an oxidizer that reacts with the proteins and fatty acids within the cell membrane, resulting in loss of permeability control and disruption of protein synthesis.
- Detergents are used to remove soil from a surface. The soil is a mixture of organic waste and bacteria that is attached to the surface of the processing equipment, floors or walls.
- Disinfecting chemicals or sanitizers are registered as pesticides in U.S Environmental Protection Agency (EPA). The Disinfectants can kill a higher number of microorganisms as compared to sanitizers.
- Growing concern over the development of resistance to certain therapeutic drugs has led to questions over microorganisms developing resistance to sanitizers. This may create a concern among the society about the application of sanitizers.

Market Segmentation:

Type (Revenue in Million USD; 2016–2026)

- Chemical
 - o Chlorine compounds
 - o Hydrogen peroxide & peracetic acid
 - o Quaternary ammonium compounds
 - o Alcohols
 - o Others
- Iodophors
- Aldehydes

Technology (Revenue in Million USD; 2016–2026)

- UV radiation
- Ozonation
- Others
 - o Dry Fogging
 - o Steam Ultrasound

Application (Revenue in Million USD; 2016–2026)

- Food surface
- Food packaging
- Food processing equipment

End Use (Revenue in Million USD; 2016–2026)

- Food industry
 - o Meat & poultry

- o Fish & seafood
- o Fruits & vegetables
- o Dairy products
- o Others
- Ready-to-eat meals
- Processed foods
- Sweeteners
- Beverage industry
- o Alcoholic beverages
- o Non-alcoholic beverages

Regional Outlook (Revenue in Million USD; 2016–2026)

- North America
 - o U.S.
 - o Canada
- Europe
 - o Germany
 - o France
 - o UK
 - o Spain
 - o Italy
 - o Rest of the Europe
- Asia Pacific
 - o China
 - o India
 - o Japan
 - o Rest of Asia-Pacific
- Middle East & Africa
- Latin America
 - o Brazil

Objective of Studies:

- To provide detailed analysis of the market structure along with forecast of the various segments and sub-segments of the global Food and Beverage Disinfection market.
- To provide insights about factors affecting the market growth. To analyze the Food and Beverage Disinfection market based on various factors- price analysis, supply chain analysis, Porter five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, Latin

America and Rest of the World.

- To provide country level analysis of the market with respect to the current market size and future prospective.

Thank you for reading this article. You can also get chapter-wise sections or region-wise report coverage for North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.
