

Aerospace Composites Market - Recent Developments in the Market's Competitive Landscape

The global Aerospace Composites market is forecasted to grow at a rate of 9.2% from USD 32.61 billion in 2019 to USD 63.37 billion in 2027

YORK CITY, NEW YORK, UNITED STATES, August 30, 2021 /EINPresswire.com/ --

The global [Aerospace Composites market](#) is forecast to reach USD 63.37 Billion by 2027, according to a new

report by Reports and Data. The global aerospace composites market is expected to experience significant growth due to the increased production of aircraft due to the boom in the aeronautical industry. The aerospace sector contributes to a significant share of the composite market due to the increased use of light materials for interior and exterior parts. The increase in air traffic associated with the number of low-cost carriers coming to emerging Asia-Pacific and Latin American economies to facilitate air travel is expected to be a key driver for the aviation industry, which will lead to, the growth in the aerospace composites market. Besides, the improved standard of living associated with the aerospace industry of laissez-faire in the Middle East has led to an increase in demand for cheap air travel, which is expected to have a positive impact on the market during the forecast period.

Reports And Data

Get a sample of the report @ <https://www.reportsanddata.com/sample-enquiry-form/3162>

The aerospace composites market is expected to grow due to strong demand for commercial and military aircraft, helicopters, business aircraft, general aviation, and spacecraft manufacturing. The growing demand for light and efficient aircraft is expected to offer immense opportunities to manufacturers of composite parts, materials, and frames during the forecast period. Continued technological advances in the application of components and structures in aircraft are expected to result in high demand for aerospace composites. With the growing demand for aircraft and pending orders, production needs have increased, which should be one of the main reasons for the penetration of aerospace composites in the market.

The COVID-19 impact:

The COVID-19 pandemic is expected to have a massive downward impact on the global

Aerospace Composites market in 2020, the reason being the halt in the aviation industry. After the pandemic, however, trends discussed in the study of the global market do hold ground.

Also, supply chain disruptions and production shutdowns have resulted in a downgraded outlook for their manufacturing, which will lead to supply and demand gaps in the future. While the industry expects things to return to near normal state well before the end of 2020, negative demand shock caused by the crisis is likely to last.

Reasons for Buying this Report

This report provides pin-point analysis for changing competitive dynamics

It provides a forward-looking perspective on different factors driving or restraining market growth

It provides a six-year forecast assessed on the basis of how the market is predicted to grow

It helps in understanding the key product segments and their future

It provides pin point analysis of changing competition dynamics and keeps you ahead of competitors

It helps in making informed business decisions by having complete insights of market and by making in-depth analysis of market segments

Table of Content:

Chapter 1. Market Synopsis

1.1. Market Definition

1.2. Research Scope & Premise

1.3. Methodology

1.4. Market Estimation Technique

Chapter 2. Executive Summary

2.1. Summary Snapshot, 2019-2027

Chapter 3. Indicative Metrics

Chapter 4. Aerospace Composites Market Segmentation & Impact Analysis

4.1. Aerospace Composites Market Material Segmentation Analysis

4.2. Industrial Outlook

4.2.1. Market Indicators Analysis

4.2.2. Market Drivers Analysis

4.2.2.1. Expansion of New Aircraft Fleet

4.2.2.2. Increasing Demand from Commercial Aircrafts

4.2.2.3. Decreasing Production Costs

- 4.2.3. Market Restraints Analysis
 - 4.2.3.1. High Prices of Composites
 - 4.2.3.2. Recyclability Issues
 - 4.2.3.3. Lack of Manufacturing Technology Standards
- 4.3. Technological Insights
- 4.4. Regulatory Framework
- 4.5. ETOP Analysis
- 4.6. Porter's Five Forces Analysis
- 4.7. Competitive Metric Space Analysis
- 4.8. Price trend Analysis
- 4.9. Customer Mapping
- 4.10. Covid-19 Impact Analysis
- 4.11. Global Recession Influence...

Further key findings from the report suggest

Composites also offer ease of design compared to metals, which is expected to stimulate market demand further. The demand for aerospace composites is expected to be high in the civil aviation sector, particularly for business aircraft, single-aisle aircraft, and main jets.

Carbon fiber composites, of all types of composites, accounted for the largest share of the market in the year 2019. It can be mainly attributed to the high demand for carbon fiber composites due to their high tensile strength, their high chemical resistance, their tolerance to high temperatures, their low thermal expansion, and exceptional load capacity compared to other materials.

The thermosetting category held the largest market share in terms of volume and value in 2019, based on the type of resin. The superior properties of thermosetting resins, such as mechanical strength, corrosion resistance, and low weight that have led to their increased adoption in various aerospace applications. Also, thermosetting resins provide high rigidity and tensile strength to aircraft components, which make them preferred in the aerospace industry.

North America represented the largest share of the aerospace composites market in 2019. It is due to the presence of a broad base in the region for the manufacture of all types of aircraft. Besides, the region is a significant exporter of commercial aircraft to the APAC, MEA, and European regions.

Key participants include Solvay Group, Hexcel Corporation, Royal Tencate N.V., Teijin Limited, Toray Industries Inc., Royal DSM N.V., SGL Group – The Carbon Company, Mitsubishi Rayon Co. Ltd., Renegade Materials Corporation, and Quantum Composites, among others.

For the purpose of this report, Reports and Data have segmented into the global Aerospace Composites market on the basis of Fiber Type, Resin Type, Application, Aircraft Type, and Region:

Fiber Type Outlook (Revenue, USD Billion; 2017-2027)

- Ceramic Fiber
- Glass Fiber
- Carbon Fiber
- Aramid Fiber

Resin Type Outlook (Revenue, USD Billion; 2017-2027)

- Thermoset
- Thermoplastic
- Others

Application Outlook (Revenue, USD Billion; 2017-2027)

- Interior
- Exterior

Aircraft Type Outlook (Revenue, USD Billion; 2017-2027)

- Commercial Aircraft
- Business and General Aviation
- Civil Helicopter
- Military Aircraft
- Others

Regional Outlook (Revenue, USD Billion; 2017-2027)

- North America
 - U.S
- Europe
 - U.K
 - France
- Asia Pacific
 - China
 - India
- Japan
- MEA
- Latin America

Brazil
