

Data Center Infrastructure Management Market Grows At 28% With Increase In Datacenter IP Traffic

The Business Research Company's Data Center Infrastructure Management Global Market Report 2021: COVID-19 Implications And Growth

LONDON, GREATER LONDON, UK,
August 31, 2021 /EINPresswire.com/ --

The global [data center infrastructure management market size](#) is expected to grow from \$1.65 billion in 2020 to \$2.12 billion in 2021 at a compound annual growth rate (CAGR) of 28.1%. The change in growth trend is mainly due to the companies stabilizing their output after catering to the demand that grew exponentially during the COVID-19 pandemic in 2020. The data center infrastructure management market is expected to reach \$5.11 billion in 2025 at a CAGR of 24.7%.

An increase in data center IP traffic is expected to propel the growth of the data center infrastructure management market in the forecast period. There has been an exponential increase in internet usage and IP traffic in data centers across the globe due to the pandemic and people working from home. According to Vxchange, a US-based company that offers data centers and colocation services data center IP traffic is predicted to reach 20.6 zettabytes (ZB) by the end of 2021. Another article published by International Energy Agency (IEA) in June 2020, states that between February and mid-April 2020, global internet traffic increased by nearly 40% and the majority of the world's Internet Protocol (IP) traffic goes through data centers with which the global IP traffic is expected to double between 2019 and 2022. This rise in the data center IP traffic is increasing the need for more data centers and in turn, swelling the demand for data center infrastructure management and services. Thus, the surge in data center traffic is expected to boost the growth of the data center infrastructure management market.

North America was the largest region in the data center infrastructure management market in 2020. Asia Pacific is expected to be the fastest-growing region in the forecast period. The regions

covered in this report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, and Africa.
