

# Anti-Static Films Market Grows With Increased E-Commerce Penetration

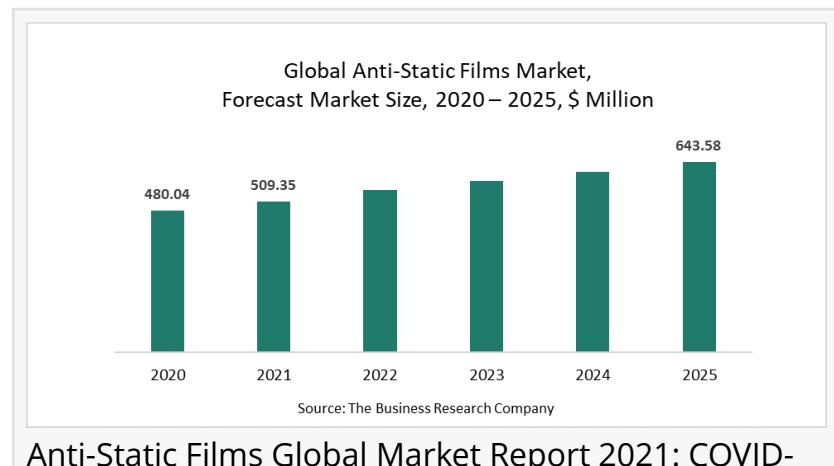

*The Business Research Company's Anti-Static Films Global Market Report 2021: COVID-19 Growth And Change*

LONDON, GREATER LONDON, UK, August 31, 2021 /EINPresswire.com/ -- The increasing penetration of the e-commerce industry is expected to propel the growth of the anti-static films market in the forecast period. E-commerce refers to the purchase and sale of goods and services over an electronic network. Anti-static plastic films are available in a range of shapes and sizes, including bubble covers, films, and foams, and these films are commonly used by retailers to package electronics and non-electrical products. According to Finaria, a finance and investment company, the COVID-19 outbreak contributed to an increase in the number of global e-commerce users and resulted in 3.4 billion users in 2020, recording a growth of 9.5% compared to 2019. The total number of e-commerce users worldwide is predicted to reach 3.8 billion in 2021 and 4.9 billion in 2025. Moreover, as per the India Brand Equity Foundation (IBEF), the e-commerce industry in India is anticipated to reach \$200 billion by the end of 2020. Therefore, the increasing penetration of e-commerce drives the growth of the anti-static films market.

The [global anti-static films market size](#) is expected to grow from \$480.04 million in 2020 to \$509.35 million in 2021 at a compound annual growth rate (CAGR) of 6.1%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The anti-static films market is expected to reach \$643.58 million in 2025 at a CAGR of 6%.
