Dubai, United Arab Emirates- August 31, 2021- The Rise of Blockchain Technology in Agriculture will be one of the main topic on 29th of September 2021 at The Oberoi Dubai, Dubai, UAE from 2pm to 6pm and will be followed by cocktails post-networking reception at 6pm to 8pm.

BLOCKCHAIN provides a secure way of storing and managing data, which facilitates the development and use of data-driven innovations for smart farming and smart index-based agriculture insurance. It is an emerging digital technology allowing ubiquitous financial transactions among distributed untrusted parties, without the need of intermediaries such as banks. It enables the traceability of information in the food supply chain and thus helps improve food safety.

BLOCKCHAIN technology gains success and proves its functionality in many cryptocurrencies, various organizations and other entities aim at harnessing its transparency and fault tolerance in order to solve problems in scenarios where numerous untrusted actors get involved in the distribution of some resource. Two important, highly relevant areas are agriculture and the food supply chain. Agriculture and food supply chains are well interlinked since the products of agriculture almost always are used as inputs in some multi-actor distributed supply chain, where the consumer is usually the final client.

This Agriculture Investment Forum 2021 "Let's grow together" by The Abrahamic Business Circle aims to gather Investors and Leaders around the globe to participate in a relevantly focused agenda on sharing insights, inspiration and knowledge while continuing to sustain long-standing relationships among the organization's GLOBAL members and event participants within a high-level business environment.
