

Datagate Launches Datto Autotask PSA Integration

MSPs can run their businesses through Datto Autotask while Datagate generates the specialized telecom invoices visible to any staff member using the PSA

JACKSONVILLE, FLORIDA, USA, September 1, 2021 /EINPresswire.com/ -- Datagate Innovation, the leading SaaS telecom billing solution for MSPs, has announced a new integration with Datto Autotask PSA. This integration introduces functionality that delivers significant time and cost savings to MSPs using the popular Datto Autotask PSA platform.

Datagate integrates with Datto's Autotask Professional Services Automation (PSA) platform.

A two-way flow of information between Datagate and Datto Autotask eliminates the need for rekeying data. Datagate will synchronise information from Datto Autotask such as customer details, products, and contracts.

MSPs using Datto Autotask can now get smooth automation of telecom billing that's fully integrated with the best telecom tax engines and popular accounting systems such as QuickBooks and Xero. Integrating the telecom billing solution directly into PSAs like Datto Autotask and ConnectWise is key to automating invoicing for telecom services, says Datagate CEO Mark Loveys.

"Datagate is committed to integrating with the software that's important to MSPs so that telecom billing is easy, quick, and automatic," he says.

"We focus 100 percent on the MSP market. Our latest Datto Autotask connector is a result of listening to MSPs and delivering what they want. Selling voice services as an MSP no longer means extra work or hassle."
