

# Security Testing Market to Reach \$36.78 Billion by 2030, Says Allied Market Research

*Stringent government regulations to increase the adoption of security testing solutions & services drive the growth of the global security testing market.*

PORTLAND, OREGON, UNITED STATES, September 1, 2021

/EINPresswire.com/ -- Surge in web & mobile-based business applications and stringent government regulations to increase the adoption of security testing solutions & services drive the growth of the global security testing market. On the other hand, lack of skilled security professionals and high implementation cost impede the growth to some extent. Nevertheless, increased adoption of cloud-based security testing, the evolution of technologies, and implementation of new technologies, such as DevOps, DevSecOps, and Agile in software security testing are expected to create lucrative opportunities in the industry. According to the report published by Allied Market Research, the global security testing market was estimated at \$6.25 billion in 2020 and is expected to hit \$36.78 billion by 2030, registering a CAGR of 19.2% from 2021 to 2030.

On the basis of deployment mode, the on-premise segment held the major share in 2020, garnering nearly three-fifths of the global security testing market, due to increase in adoption of

on-premise security testing product among organizations as it offers an array of benefits such as increased security of the data collection devices, enhanced operation of the business, and so on. The cloud segment, on the other hand, is projected to cite the fastest CAGR of 20.8% throughout the forecast period, owing to rise in demand from the small & medium size enterprises toward the cloud based security testing platform to detect potential threats in the system.

On the basis of security type, the network security segment contributed to the lion's share in 2020, holding more than half of the global security testing market, due to rise in adoption of network security testing in organizations to achieve security compliance with the mandatory government regulations. However, the device security segment is projected to manifest the fastest CAGR of 21.4% from 2021 to 2030. Rise in demand for device security testing platform among medical device manufacturers for protecting crucial customer information propels the segment growth.
