

Zeolite Molecular Sieve Market Research Report 2021 | Share, Size, Growth and Forecast 2026

SHERIDAN, WYOMING, UNITED STATES, September 2, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[Zeolite Molecular Sieve Market](#): Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026," the global zeolite molecular sieve market to continue its moderate growth during the next five years.

Zeolite molecular sieves are crystalline aluminosilicates minerals that involve a definite pore size and structure. They are small, pink-colored beads that are composed of sodium, potassium, magnesium, and calcium. Zeolite

molecular sieves mainly act as a catalyst and an efficient absorbent in chemical and separation processes. Consequently, they are commonly used in the [oil](#) and gas sector to manufacture detergents and refrigerants, facilitate separation in water treatment applications, and dehydrate ethanol, methane, air, and cracked gases.

Zeolite Molecular Sieve Market

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Global Zeolite Molecular Sieve Market Trends:

The escalating demand for high-performance catalysts in the oil and gas industry is majorly driving the global zeolite molecular sieve market growth. The escalating need for efficient water treatment systems is further catalyzing the market growth. Moreover, since zeolite molecular sieve are used as a binding agent in liquid and [powder](#) substances, the inflating sales of

products, such as soaps and detergents, are contributing to the market growth. Besides this, continuous product innovations, such as silver-infused sieves with antimicrobial properties, are creating a positive outlook for the market further.

Global Zeolite Molecular Sieve Market 2021-2026 Analysis and Segmentation:

Competitive Landscape:

The competitive landscape of the market has been studied in the report with the detailed profiles of the key players operating in the market.

Arkema Group, BASF SE, CWK Chemiewerk Bad Köstritz GmbH, Honeywell UOP (Honeywell), Interra Global Corporation, KNT Group, Tosoh Corporation, Tricat Group, W. R. Grace & Company and Zeochem AG (Cph Chemie & Papier).

The report has segmented the market on the basis on region, disc type, material type and end user.

Breakup by Material:

- Natural Zeolite
- Artificial Zeolite

Breakup by Grade:

- Type 3A
- Type 4A
- Type 13X
- Others

Breakup by Application:

- Catalyst
- Adsorbent
- Desiccants

Breakup by End User Industry:

- Oil and Gas Industry
- Agricultural Industry

- Chemical Industry
- Pharmaceutical Industry
- Water Treatment Industry
- Construction Industry
- Others

Breakup by Region:

- North America: (United States, Canada)
- Asia Pacific: (China, Japan, India, South Korea, Australia, Indonesia, Others)
- Europe: (Germany, France, United Kingdom, Italy, Spain, Russia, Others)
- Latin America: (Brazil, Mexico, Others)
- Middle East and Africa

Key highlights of the report:

- Market Performance (2015-2020)
- Market Outlook (2021-2026)
- Porter's Five Forces Analysis
- Market Drivers and Success Factors
- SWOT Analysis
- Value Chain
- Comprehensive Mapping of the Competitive Landscape

If you need specific information that is not currently within the scope of the report, we can provide it to you as a part of the customization.

If you want latest primary and secondary data (2021-2026) with Cost Module, Business Strategy, Distribution Channel, etc. Click request free sample report, published report will be delivered to you in PDF format via email within 24 to 48 hours of receiving full payment.

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.
