

Global Urology Medical Lasers Market Trends, Strategies And Opportunities In The Urology Medical Lasers Market 2021-2030

The Business Research Company's Urology Medical Lasers Global Market Report 2021 : COVID-19 Growth And Change

LONDON, GREATER LONDON , UK, September 2, 2021 /EINPresswire.com/ -- According to the new market research report 'Urology Medical Lasers Global Market Report 2021 - COVID-19 Growth And Change' published by The Business Research Company, the global [urology medical lasers market](#) is expected to grow from \$0.87 billion in 2020 to \$0.92 billion in 2021 at a compound annual growth rate (CAGR) of 5.3%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$1.15 billion in 2025 at a CAGR of 6%. Rising cases of urological disorders contribute to the demand for the urology medical lasers market.

The urology medical lasers market consists of sales of urology medical lasers and related services by entities (organizations, sole traders, and partnerships) that manufacture urology medical lasers. Medical lasers are a non-invasive and efficient source of light used to tissue treatment that provides fast healing without discoloration or scarring. Urology medical lasers are used in the treatment of medical conditions related to the urinary system such as urinary stones, benign prostatic hyperplasia (BPH), bladder or prostate cancer, and traumatic injuries.

Trends In The Global Urology Medical Lasers Market

Major players operating in the market are continuously focusing on developing new products incorporating advanced technology to meet the requirement of medical professionals. For instance, in June 2020, Olympus Corporation, a Japanese manufacturer of innovative medical and surgical products, launched the Soltive Super Pulsed Thulium Fiber Laser System designed for stone lithotripsy and soft tissue applications in urology. The Super Pulsed thulium fiber laser dust stones into very fine particles and faster than other laser systems.
