The vegan cheese market growth is primarily attributed to a host of factors, including consistent rise in the number of vegan consumer base worldwide, growing awareness regarding the benefits of vegan food products, mounting environment protection concerns, animal welfare, and evolving consumer trends.

Vegan cheese is one of the plant-based non-dairy food products, which has been gaining significant popularity among the vegan and flexitarian population. Dynamic changing food consumption pattern and increase in awareness among population regarding lactose intolerance

drive the market growth. Furthermore, increase in animal welfare concerns coupled with rise in demand for dairy analogue products further boost the market growth.

However, animal-based cheese gained extreme popularity among consumer, which is likely to be very intense challenge for the vegan cheese manufactures to gain attention. High prices and lack of awareness are anticipated to hinder the growth of the vegan cheese market during the forecast period.
