

# The Mesothelioma Options Help Center of Louisiana Endorses The Steinberg Law Group as the Best Mesothelioma Law Firm

*The Mesothelioma Options Help Center of Louisiana Endorses The Steinberg Law Group as the Best Mesothelioma Law Firm - Experience/Resources/Results*

BATON ROUGE, LOUISIANA, USA, September 2, 2021 /EINPresswire.com/ -- The [Mesothelioma](#) Options Help Center of Louisiana is dedicated to providing the best possible legal and medical assistance to those stricken with mesothelioma or [asbestos](#)-related lung cancer. Anyone wishing to discuss their legal and/or medical options should call (888) 891-2200 to speak directly with an attorney from The [Steinberg](#) Law Group.

The Mesothelioma Options Help Center of Louisiana has endorsed The Steinberg Law Group because of their vast experience in handling mesothelioma and other asbestos-related cases. With offices in New York, California and Texas, The Steinberg Law Group has a national footprint that helps win the best possible financial compensation for clients.

Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2021 were exposed decades ago.

The Steinberg Law Group is affiliated with doctors around the country.

The image shows a woman in a tan blazer standing between two male doctors in white lab coats. They are in a bright, modern office setting with large windows in the background. The text above the image reads 'SLG THE STEINBERG LAW GROUP Experience/Resources/Results'.

Due to Louisiana's proximity to the Gulf of Mexico, many residents of the state were employed in the oil refinery industry, where they had an extremely high risk of exposure to asbestos, which was used to insulate tanks, vats and pipelines. More recently, in 2005, police, firefighters and volunteers were exposed to asbestos in the aftermath of Hurricane Katrina, which devastated the state and disturbed vast amounts of otherwise untouched asbestos.

Jobsites and locations with known asbestos exposure in Louisiana include, but are not limited to, Calumet Refinery, Marathon Refinery, Placid Refining Refinery, W.R. Grace Exfoliation Facility, Higgins Shipyard, Louisiana Superdome, Motiva Norco Refinery, Bollinger Shipyards, Calcasieu Refinery, Conoco Refinery, Citgo Refinery, Valero Refinery, Port of Baton Rouge, Rosenwald Middle School, Southern Mineralite Exfoliation Facility, Avondale Shipyards, Todd Shipyard, Abbeville Rice Mill, Simon Rice Mill, J.
