

Pomegranate and Pomegranate Arils Market Size, Share, Major Players, Growth, Trends And Forecast Till 2026

Pomegranate juice may contain close to three times the antioxidants as green tea or red wine.

NEW YORK CITY, NEW YORK, UNITED STATES, September 3, 2021

/EINPresswire.com/ -- The global

[Pomegranate and Pomegranate Arils market](#) is expected to reach USD 23.14

Billion by 2026, according to a new

report by Reports and Data. Pomegranate can act as a potential nutraceutical which can provide medical and health benefits, including prevention and treatment of a disease. Pomegranate contains agents like polyphenolic flavonoids, which deploy actions well conducive to good oral health; precisely in relation to gingivitis development. Pomegranate juice has the highest antioxidant potency composite index among beverages like Red wine, Blueberry juice, Acai juice and Orange juice to name a few; and the antioxidant activity was at least 20% superior to any other beverages.

Further key findings from the report suggest

- The market for Organic type market is projected to grow significantly and deliver a CAGR of 13.5% owing to the super fruit's health benefits which includes antioxidant properties, high potassium content and a good source of fiber. An increase in the consumer interest for high food nutrition and the general opinion among the consumers that fresh produce hold the desirable nutrition and fiber have led to an increasing interest among growers to grow fresh produce.
- The market for Bhagwa pomegranates is anticipated to grow at a revenue of 54.99 billion by 2025. These pomegranates are tolerant to thrips and mites and thus require comparatively lesser number of pesticide sprays
- Asia-Pacific will witness significant rise at a CAGR of 14.6% from 2018 to 2025. Asia Pacific is the largest producer of pomegranate. The countries in the region grow a wide range of

pomegranate varieties and have high consumption of pomegranate and its products. The region is expected to hold 38.6% share of the pomegranate and pomegranate arils market in 2018.

- The main constraint in Pomegranate remains the fruit production precisely the supply side of it. Developing countries are failing to keep up the quality standards as productivity of the fruit is very low, though the fruit production in those countries is increasing. For example, in India the average yields are 10Mt/Ha where the international average hovers around 25Mt/Ha.

Additionally in countries like Afghanistan, there are no operational standards of conducts; every farmer grows on his own way.

- The legal laws in US regarding imports of fresh pomegranates from Chile involve production site registration with National plant protection organization (NPPO) of Chile. The fruit must originate from low prevalence production site. Post harvesting process would include the damaged and diseased fruits must be culled at the packinghouse and must be packed into new and clean crates, or APHIS approved packaging containers.
