

Enterprise Resource Planning Market Report 2021, Size, Share, Trends, Analysis and Forecast to 2026

SHERIDAN, WYOMING, UNITED STATES, September 3, 2021 /EINPresswire.com/ -- According to IMARC Group's latest report, titled "[Enterprise Resource Planning \(ERP\) Market](#): Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026," the global enterprise resource planning (ERP) market exhibited strong growth during 2015-2020. Looking forward, the market is expected to grow at a CAGR of 8.2% during 2021-2026.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

The enterprise resource planning (ERP) platform integrates various administrative and operational [business](#) processes into a unified system. It primarily controls core, end-to-end, and real-time business activities, along with enhancing operational efficiency, reducing risks, fostering collaboration and supply chain management, etc. As a result, ERP is widely adopted across several organizations to minimize overall operational and capital expenses.

Market Trends

The rising digitization of several business processes has escalated the adoption of ERP solutions to automate tasks and streamline information in various departments. ERP also helps in integrating financial processes, human resource management, providing analytical support to managers, and effectively managing project life cycle. As a result, it is increasingly being utilized in the banking, financial services, and insurance (BFSI) industry worldwide. Besides this, the expanding healthcare sector has led to the rising demand for ERP in minimizing clinical errors,

improving patient care, and monitoring clinical and administrative costs. Additionally, the sudden outbreak of the COVID-19 pandemic has led to the implementation of stringent lockdown regulations resulting in the widespread adoption of [remote](#) working models across several organizations. As a result, there is an increasing demand for cloud-based ERP solutions for remote management of complex systems and to meet several compliance standards for enhanced data security.
