

# Super Absorbent Polymers Market Report 2021: Size, Share, Market Analysis, Growth and Forecast

---

*According to the latest report by IMARC Group, the global super absorbent polymers market to grow at a CAGR of around 12% during 2021-2026.*

SHERIDAN, WYOMING, UNITED STATE, September 3, 2021 /EINPresswire.com/ -- According to the latest report by IMARC Group, the global [super absorbent polymers market](#) exhibited strong growth during 2015-2020. Looking forward, IMARC Group expects the market to grow at a CAGR of around 12% during 2021-2026.

Super absorbent polymers (SAPs) are water-absorbing materials prepared using suspension, solution, and gel polymerization. They are widely utilized in the agricultural sector for improving the water holding capacity of the soil, decreasing drought stress, and increasing the time between irrigation events. Besides this, they find application in the automotive, construction, and packaging industries across the globe.

## Market Trends:

SAPs help protect against skin irritation, keep the skin dry, and prevent infections. As a result, there are widely utilized in the manufacturing of personal hygiene products. Moreover, a significant increase in the demand for feminine hygiene products, fluff-less baby diapers, and adult incontinence products that are thinner and softer is strengthening the market growth. Apart from this, SAPs are extensively used in the production of food packaging, coatings and paper, and adhesives. This, along with increasing investments in research and development (R&D) activities to manufacture bio-based SAPs, is impelling the market growth.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Global Super Absorbent Polymers (SAP) Market Coverage and Segmentation 2021-2026:

Competitive Landscape:

The competitive landscape of the market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

BASF  
Evonik Industries  
Formosa Plastics Group  
Kao Corporation  
LG Chem Ltd.  
Nippon Shokubai  
Satellite Science and Technology Co. Ltd.  
SDP Global Co. Ltd.  
Sumitomo Seika Chemicals Company Ltd.  
Yixing Danson Technology Ltd.

Explore full report with table of contents: <https://www.imarcgroup.com/super-absorbent-polymers-market>

The report has segmented the market on the basis of Product Type, End-User and Region.

Breakup by Type:

Sodium Polyacrylate  
Polyacrylate/Polyacrylamide Copolymer  
Others

Breakup by Application:

Personal Hygiene  
Agriculture  
Medical  
Industrial  
Others

Breakup by Production Method:

Suspension Polymerization  
Solution Polymerization  
Gel Polymerization

Market Breakup by Region:

North America (United States, Canada)

Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, Others)

Europe (Germany, France, United Kingdom, Italy, Spain, Russia, Others)

Latin America (Brazil, Mexico, Others)

Middle East and Africa

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.
