

Global Organic Oilseed Farming Market Trends, Strategies, And Opportunities In The Market 2021-2030

The Business Research Company's Organic Oilseed Farming Global Market Report 2021: COVID-19 Growth And Change

LONDON, GREATER LONDON, UK, September 3, 2021 /EINPresswire.com/ -- According to the new market research report 'Organic Oilseed Farming Global Market Report 2021 - COVID-19 Growth And Change' published by The Business Research Company, the global [organic oilseed farming market](#) is expected to grow from \$7.97 billion in 2020 to \$8.44 billion in 2021 at a compound annual growth rate (CAGR) of 5.9%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$11.07 billion in 2025 at a CAGR of 7%. Growing demand for organic oil extracted from organic oilseeds and its by-products are driving the organic oilseeds farming market.

The organic oilseed farming market consists of sales of oilseeds by farms that produce them organically without the use of artificial fertilizers, pesticides and genetically modified organisms.

Trends In The Global Organic Oilseed Farming Market

Growing demand for organic oil extracted from organic oilseeds and its by-products is driving the organic oilseeds farming market. The increase in awareness about the harmful effects of conventionally produced oil on an individual's health as well as on the environment is making individuals prefer the oil produced from organic oilseeds. The demand is not only for edible purposes but also to produce greener cosmetics. The by-products produced after the extraction from organic oilseeds are used as a high protein organic feed for animals reared through the organic way. For instance, in June 2019, five farmers of Scotland, with support from Scotland's Rural Innovation Support Service (RISS) has launched a pilot project along with a feed processor to grow the first organic oilseed rape crop in the UK to meet the demand for organic protein feed for pigs. Trillium Organics is offering USDA certified organic skin care products made from organically produced ingredients. Their organic body oil is made with olive, jojoba, and sunflower oils. Therefore, the growing demand for organic oil extracted from organic oilseeds and their by-products drives the organic oilseed farming market.

[Global Organic Oilseed Farming Market Segments:](#)

The global organic oilseed farming market is further segmented:

By Type: Soybeans, Sesame, Rapeseed, Groundnuts, Sunflower Seed, Others
