The Business Toolkit Now Offering Four Logo Design Packages

An industry leader in marketing, branding design is now offering a variety of design packages.

MIAMI, FLORIDA, UNITED STATES, September 6, 2021 /EINPresswire.com/ -- Representatives with The Business Toolkit announced today that it is now offering four logo design packages.
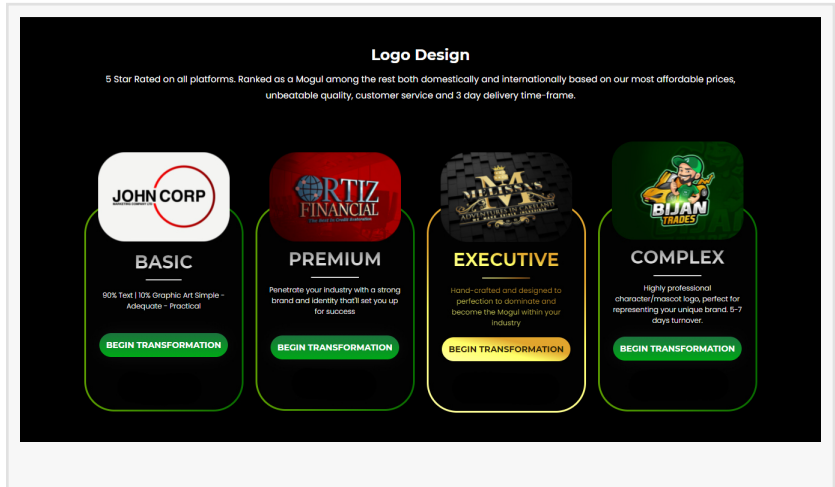

"We are very excited to offer these four unique logo design packages," said

Stefan Jugmohan, CEO of The Business Toolkit, a BBB-accredited company that specializes in transforming startups to Fortune 500 companies. "We believe that anything short of perfection is unacceptable and we help our clients realize their vision with the highest level of direct communication, satisfaction and trustworthiness."

The Business Toolkit, which has delivered branding concepts and designs to more than 3,200 businesses in its first year in business, offers four distinct logo design packages - Basic, Premium, Executive, and Complex.

Jugmohan revealed that the Basic Package empowers customers with a simple design that includes 90 percent text and 10 percent graphic art. The Premium Package allows customers to penetrate their industry with a strong brand and identity that sets them up for success.

The Executive Package, Jugmohan noted, is hand-crafted and designed to put customers in the best position to dominate and become the mogul within their industry. The Complex Package empowers customers with a highly professional character/mascot logo that's perfect for representing a unique brand.

In addition to The Business Toolkit offering four logo design packages, the company also recently launched its design services in Canada and the United Kingdom (UK). Services include logo design, logo animation (motion graphics), product packaging (labels, book covers, front and back product packaging with bar codes, and more), marketing materials, social media marketing, and

web development.
