

AEE Technology collaborates with Schiller Americas taking AEDs to new heights

Announcing a new collaboration partnership between AEE Technology commercial drones and Schiller Americas medical technologies

LAS VEGAS, NEVADA, UNITED STATES, September 7, 2021 /EINPresswire.com/ -- Las Vegas, Nevada/ Commercial UAV Expo Mirage Convention Center Booth #823, September 7, 2021-

Imagine what happens when [AEE Technology](#) Inc, a world class leader in Commercial Unmanned Aerial Vehicles works in partnership with [Schiller Americas](#), a world class leader in life saving emergency response medical equipment? Imagine no more, Mike Kahn, Chief Marketing Officer of AEE Technology and Dr Francesco Iacona Chief Executive Officer of Schiller America, announce the signing of Memorandum of Understanding (MOU), an agreement to jointly develop and bring to market aerial delivery systems for automated external defibrillators (AEDs) in a joint effort to save lives worldwide.

Each year millions of people around the world die from sudden cardiac arrest (SAC) as their heart literally stops beating. With the invention public access AEDs many lives are saved each year, but these AEDs are still not as widely available as they are needed. Enter the opportunity for AEE and Schiller to work together to bring the life saving technology of AEDs to people in need, in minutes when lives can be saved.

Using the latest Mach Series AEE UAV Systems like the newly announced AEE Mach™ 6, the rapidly deployable drones can be launched carrying Schiller AEDs from Public Safety Staging areas in cities around the world. The AEE systems can use standard street addresses and point of interest GPS data to quickly fly to locations where the Schiller AED is needed to save lives.

“Time is the key, if the AED can be applied within the first five minutes of sudden cardiac arrest, we have a real chance for a good outcome. A matter of few minutes makes all the difference in saving a life with an AED” says Schiller Americas’ Dr. Francesco Iacona who is not only the CEO of Schiller Americas but also a Cardiologist MD. Mike Kahn, CMO of AEE goes on to say “the AEE drone systems can be used to quickly and efficiently bring this vital medical technology to emergency locations beyond congested roads or in rugged inaccessible terrains; we hope that our partnership with Schiller save lives”

Schiller’s easy to use multiple language portable AEDs coupled with AEE’s Fly to Address Commercial Drones will be jointly developed into a lifesaving deployment system which will be comarketed by both Schiller Americas and AEE Technology to maximize its availability around the globe.

More details will be made available in the future on final development of the deployment system and advanced field testing.

About AEE

AEE Technology Inc. is based in Walnut California and an industry leader in developing, marketing, and selling professional commercial unmanned aerial vehicles. AEE is a pioneer in combining wireless audio and video transmissions with imaging and processing and intelligent control technologies and smart aircraft design for professional unmanned aerial vehicles.
