LASER is an acronym for Light Amplification by Stimulated Emission of Radiation. Construction lasers are used in the construction industry for levelling, surveying, measuring, and aligning activities. The construction laser is a tool that consists of a laser projector, which emits laser beams toward a specific object. This laser beam is used to calculate numerous civil measurements such as distance, angle, elevation, and grade. Construction lasers provide quick and accurate construction activities as compared to traditional methods.

Key Market Players

AdirPro

Stanley Black & Decker, Inc.

Hilti Corporation

Johnson Level & Tool Mfg. Co., Inc.

Kapro Industries Ltd.

Pacific Laser Systems (Fortive Corporation)

Robert Bosch GmbH

STABILA Messgeräte Gustav Ullrich GmbH

Trimble, Inc. (Spectra Precision)

Topcon Corporation (Topcon Positioning Systems, Inc.)

Key Benefits

The report provides an extensive analysis of the current and emerging trends and dynamics in the global construction lasers market.

An in-depth analysis is conducted by constructing market estimations for the key market segments between 2017 and 2025.

An extensive analysis is conducted by following key product positioning and monitoring the top competitors within the market framework.

A comprehensive analysis of all regions is provided that determines the prevailing opportunities across various geographies.

The key market players are profiled, and their strategies are analyzed thoroughly, which helps to understand the competitive outlook of the market.

Key Market Segments

By Product

- Rotary level laser
- Liner laser level
- Plumb/dot laser
- Others

By Range

- 1ft to 100ft
- 101ft to 200ft
- 201ft and above

By Region

- North America
- Europe
- Asia-Pacific
- LAMEA
